Crisis In Eden A Religious Study Of Man And Environment:

Crisis in Eden Frederick Elder,1970 Christianity and Ecological Theology E. M. Conradie,2006-10-01 There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so These include a number of recent edited volumes each covering a range of topics and consolidating many of the emerging insights in ecological theology The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa EPA-600/5 ,1974-02 *The Word of Truth* Dale Moody,1981-01-16 Bringing together the insights of several disciplines biblical theology modern science biblical criticism textual source form redaction historical theology and the history of doctrine Moody develops a systematic theology that is biblically grounded and ecumenically oriented Thoroughly indexed *The Theological Imagination* Gordon D. Kaufman,1981-01-01 In this challenging work Gordon Kaufman asserts that the prime task of theology is the imaginative construction of the doctrine of God Kaufman maintains that both the absoluteness of the divinity and our own necessity demand that we construct the doctrine of God critically and in a manner appropriate to our own time and place In thorough examinations of God and theology Christ and christology and of the ultimate foundations of religious thought he shows how this construction can be accomplished faithfully and in full realization of our own humanity **Study Week on a Modern Approach to the Protection of the Environment, November 2-7, 1987** Giovanni Battista Marini-Bettòlo,1989 These Proceedings consider all aspects of the environmental problems facing the world today scientific social economic philosophical and historical Many of the discussions which followed paper presentations are included in the text Along with scientific discussions of solutions to particular problems the book argues for a new approach to thought and action in the use of natural resources If a constructive global strategy towards the protection of the environment is to be socially compatible and economically sound then it must be developed through an interdisciplinary approach which will avoid the impractical solutions which might be suggested by theoretical or unilateral considerations Ecological economic social and cultural research must be accompanied by the development of a new mentality of respect for the environment which will inculcate a reasonable and moderate use of natural resources *The Genius of Earth Day* Adam Rome,2013-04-16 A comprehensive and enlightening history of Earth Day 1970 one of the largest and most important political events of the twentieth century The first Earth Day is the most famous little known event in modern American history Because we still pay ritual homage to the planet every April 22 everyone knows something about Earth Day Some people may also know that Earth Day 1970 made the environmental movement a major force in American political life But no one has told the whole story before The story of the first Earth Day is inspiring it had a power a freshness and a seriousness of purpose that are difficult to imagine today Earth Day 1970 created an entire green generation Thousands of Earth Day organizers and participants decided to devote their lives to the environmental cause Earth Day 1970 helped to build a lasting eco infrastructure lobbying organizations
