Critical Issues in Electronic Media Simon Penny, 2015-03-10 *Critical Issues in Electronic Media* is an interdisciplinary sourcebook that offers new critical perspectives directly related to or arising from the practice of electronic media art. It sketches the changing topology of culture as it enters electronic space and specifically addresses questions of art practice in that space. Some of the contributions focus on the dynamics of specific emerging media such as interactive media while others look at the cultural conditions formed by and forming around new technological complexes. Still others examine contemporary technocultural manifestations against a background of social and technological history. The contributors are professionally and geographically diverse representing professional fields such as computer graphics, video, sound, drama, and visual arts as well as media, cultural, and literary theory and the social sciences. Together these essays provide a rich survey of contemporary technological critique and offer a perspective on creative practice in technological media. **Critical Issues**

Essays discuss each participant and explore larger issues such as how artists continue to challenge and transform the exhibition space, spawning new and unexpected activities.
