Critical Issues In The History Of Canadian Science Technology And Medicine:

Critical Issues in the History of Canadian Science, Technology and Medicine : Second Conference on the History of Canadian Science, Technology and Medicine, Kingston, Ontario, 1981 Conference on the History of Canadian Science, Technology and Medicine (2Nd : 1981 : Kingston, Ont.),1983 *Critical Issues in the History of Canadian Science, Technology, and Medicine* Richard A. Jarrell,Arnold E. Roos,1983 The Second Kingston Conference on the History of Canadian Science Technology and Medicine held at Queen s University Kingston Ontario in November 1981 was the second national conference on these new disciplines It was also the first meeting of the Canadian Science and Technology Historical Association Association pour l histoire de la science et de la technologie au Canada This volume contains seventeen invited papers read at the conference and highlights current research in such areas as institutional history social history of medicine transportation problems urban technology the selling of science to Canadians and problems of interpretation in science and technology museums **Secondary Sources in the History of Canadian Medicine** Charles G. Roland,2006-01-01 This work is a bibliography of secondary sources in Canadian medical history **Epidemics, Empire, and Environments** Michael Zeheter,2016-01-20 Throughout the nineteenth century cholera was a global scourge against human populations Practitioners had little success in mitigating the symptoms of the disease and its causes were bitterly disputed What experts did agree on was that the environment played a crucial role in the sites where outbreaks occurred In this book Michael Zeheter offers a probing case study of the environmental changes made to fight cholera in two markedly different British colonies Madras in India and Quebec City in Canada The colonial state in Quebec aimed to emulate British precedent and develop similar institutions that allowed authorities to prevent cholera by imposing quarantines and controlling the disease through comprehensive change to the urban environment and sanitary improvements In Madras however the provincial government sought to exploit the colony for profit and was reluctant to commit its resources to measures against cholera that would alienate the city s inhabitants It was only in 1857 after concern rose in Britain over the health of its troops in India that a civilizing mission of sanitary improvement was begun As Zeheter shows complex political and economic factors came to bear on the reshaping of each colony s environment and the urgency placed on disease control Canadian History: Beginnings to Confederation Martin Brook Taylor,Doug Owram,1994-01-01 In these two volumes which replace the Reader s Guide to Canadian History experts provide a select and critical guide to historical writing about pre and post Confederation Canada with an emphasis on the most recent scholarship Cover **J.B. Collip and the Development of Medical Research in Canada** Alison Li,2003 The intriguing life of J B Collip whose restless drive fuelled his pioneering studies in endocrinology and sustained a successful research enterprise through the first half of the twentieth century The Last Plague Mark Osborne Humphries,2013-01-01 The Spanish influenza of 1918 was the deadliest pandemic in history killing as many as 50 million people worldwide Canadian federal public health officials tried to prevent the disease from entering the

country by implementing a maritime quarantine as had been their standard practice since the cholera epidemics of 1832 But the 1918 flu was a different type of disease In spite of the best efforts of both federal and local officials up to fifty thousand Canadians died In *The Last Plague* Mark Osborne Humphries examines how federal epidemic disease management strategies developed before the First World War arguing that the deadliest epidemic in Canadian history ultimately challenged traditional ideas about disease and public health governance Using federal provincial and municipal archival sources newspapers and newly discovered military records as well as original epidemiological studies Humphries sweeping national study situates the flu within a larger social political and military context for the first time His provocative conclusion is that the 1918 flu crisis had important long term consequences at the national level ushering in the modern era of public health in Canada

Home Is the Hunter Hans M. Carlson, 2009-05-01 The James Bay Cree lived in relative isolation until 1970 when Northern Quebec was swept up in the political and cultural changes of the Quiet Revolution The ensuing years have brought immense change for the Cree who now live with the consequences of Quebec's massive development of hydroelectricity timber and mineral resources in the North *Home Is the Hunter* presents the historical environmental and cultural context from which this recent story grows Hans Carlson shows how the Cree view their lands as their home their garden and their memory of themselves as a people By investigating the Cree's relationship with the land and their three hundred years of contact with outsiders the author illuminates the process of cultural negotiation at the foundation of ongoing political and environmental debates This book is more than a story of dam building and industrial logging in northern Quebec It offers a way of thinking about indigenous peoples' struggles for rights and environmental justice in Canada and elsewhere
