Nuclear Science Abstracts ,1967 TID. ,19?? **The First War of Physics** Jim Baggott,2011-08-15 An epic story of science and technology at the very limits of human understanding the monumental race to build the first atomic weapons Rich in personality action confrontation and deception The First War of Physics is the first fully realized popular account of the race to build humankind s most destructive weapon The book draws on declassified material such as MI6 s Farm Hall transcripts coded soviet messages cracked by American cryptographers in the Venona project and interpretations by Russian scholars of documents from the soviet archives Jim Baggott weaves these threads into a dramatic narrative that spans ten historic years from the discovery of nuclear fission in 1939 to the aftermath of Joe 1 August 1949 s first Soviet atomic bomb test Why did physicists persist in developing the atomic bomb despite the devastation that it could bring Why despite having a clear head start did Hitler s physicists fail Could the soviets have developed the bomb without spies like Klaus Fuchs or Donald Maclean Did the allies really plot to assassinate a key member of the German bomb program Did the physicists knowingly inspire the arms race The First War of Physics is a grand and frightening story of scientific ambition intrigue and genius a tale barely believable as fiction which just happens to be historical fact Nuclear Science and Engineering ,1971

Network Models of the Diffusion of Innovations Thomas W. Valente,1995 This text presents a key to understanding how ideas products and opinions take off and spread throughout society referred to as the diffusion of innovation and provides a means to estimate how fast or slow that spread occurs The diffusion of innovations occurs among individuals in a social system and the pattern of communications among these individuals is a social network The network determines how quickly innovations diffuse and the timing of each individual s adoption The book thus analyses how social networks structure the diffusion of innovation *Reactor Handbook: pt. Richards,2005 As Americans wrestle with debates over traditional values defense of marriage and gay rights reason often seems to take a back seat to emotion In response legal scholar Richards reflects upon the constitutional and democratic principles relating to privacy intimate life free speech tolerance and conscience that underpin these often heated debates The distillation of Richards s thirty year advocacy for the rights of gays and lesbians his book provides a reflective treatise on basic human rights that touch all of our lives He places

in context two key Supreme Court cases the 1986 Bowers v Hardwick decision and the 2003 Lawrence v Texas decision which overturned it Drawing upon his own experiences as a gay man Richards interweaves personal observations with philosophical political judicial and psychological insights to make a case that gays should be entitled to the same rights and protections that every American enjoys From publisher description **Proceedings of the American Academy of Arts and Sciences** ,1890 **Research reactors** U.S. Atomic Energy Commission,1955 **All Things Nuclear** James C.
