Critical Strategies For Social Research:

Critical Strategies for Social Research William K. Carroll, 2004 Edited by Canadian sociologist William K Carroll this thought provoking volume is designed for research methods courses in sociology and social sciences Critical Strategies for Social Research explores ways in which several key research strategies bring an emancipatory dimension to social analysis The new approaches recognize that social analysis is a form of knowledge production that takes place in a human constructed world marked by injustice and persistent inequality Carroll considers five influential and productive strategies of inquiry Dialectical Social Analysis Institutional Ethnography Participatory Action Research Critical Discourse Analysis Social Inquiry as Communicative Reason *Principles of Social Research Methodology* M. Rezaul Islam, Niaz Ahmed Khan, Rajendra Baikady, 2022-10-26 This book is a definitive comprehensive understanding to social science research methodology It covers both qualitative and quantitative approaches The book covers the entire research process beginning with the conception of the research problem to publication of findings The text combines theory and practical application to familiarize the reader with the logic of research design the logic and techniques of data analysis and the fundamentals and implications of various data collection techniques Organized in seven sections and easy to read chapters the text emphasizes the importance of clearly defined research questions and well constructed practical explanations and illustrations A key contribution to the methodology literature the book is an authoritative resource for policymakers practitioners graduate and advanced research students and educators in all social science disciplines Critical Reflexive Research Methodologies, 2023-11-07 While all oppressions are equal some are more equal than others This statement borrowed from George Orwell's *Animal Farm* and written and marinated to fit within and without our call for ethical research helps us to see how contemporary research processes are singular and fail to account for the complex histories realities and values of marginalized communities Such a failure to account and remember has had massive symbolic and material consequences on marginalized communities illustrated by the number of deaths we continue to witness everyday Those deaths have been sanctioned and authorized by the ways in which we come to know what we know and how that is imprinted in our policies and everyday existence This book looks at knowledge production as a process of giving an account of those losses in ways that help knowledge production to be a mechanism of remembering cognitive and remembering community or bring together solidarity a form of epistemological and ontological demonstration Ethical knowledge production becomes a process of relationship that remembers the histories values and realities of people in ways that are transformative and political Such an expression fails to arrive at an end and rather recognizes knowledge production as endless production of knowledge Such a process goes against neoliberal mechanism of commodifying knowledge for sale in the market This edited collection attempts to engage with current qualitative research methodologies and approaches from a critically and ethically reflexive standpoint This work seeks to unravel colonial practices that continue to hide within qualitative approaches in ways that

invite a new reimagining of working within and without qualitative methodologies. This edited collection therefore seeks to bring to the fore the lived experiences of the studied to their storied life in ways that are ethically and politically congruent. This work therefore seeks to bring forth Foucault's subterranean narratives steeped in contexts and experiences that can critically invert the dominant colonial capitalist state practices in existing research.

The Oxford Handbook of Qualitative Research Patricia Leavy, 2014. The Oxford Handbook of Qualitative Research presents a comprehensive and student-friendly overview of the field of qualitative research and is intended for students of all levels, faculty, and researchers across the social sciences. It provides strong focus on methods instruction with coverage of theoretical approaches, analysis, writing, evaluation, and the politics of research.

The Critical Study of Non-Religion Christopher R. Cotter, 2020-07-09. This book acts as a bridge between the critical study of religion and empirical studies of religion in the real world. Chris Cotter presents a concise and up-to-date critical survey of research on non-religion in the UK and beyond before presenting the results of extensive research in Edinburgh's Southside, which blurs the boundary between religion and non-religion. In doing so, Cotter demonstrates that these are dynamic subject positions and phenomena can occupy both at the same time or neither, depending on who is doing the positioning and what issues are at stake. This book details an approach that avoids constructing religion as in some way unique whilst also fully incorporating non-religious subject positions into religious studies. It provides a rich engagement with a wide variety of theoretical material rooted in empirical data, which will be essential reading for those interested in critical sociological and anthropological study of the contemporary non-religious landscape.

Beyond Method Gareth Morgan, 1983-05. Research is often seen as a neutral technical process through which researchers simply reveal or discover knowledge. A broader and more self-reflective stance is advocated in *Beyond Method*, one in which a knowledge of technique needs to be complemented by an appreciation of the nature of research as a distinctively human process through which researchers make knowledge. Such an appreciation requires a reframing of understanding and debate about research in a way that goes beyond considerations of method alone.
