Critical Traditions In Contemporary Archaeology:

Critical Traditions in Contemporary Archaeology Valerie Pinsky, Alison Wylie, 1989 *Critical Traditions in Contemporary Archaeology* Valerie Pinsky, Alison Wylie, 1990 **Thinking from Things** Alison Wylie, 2002-11-13 No other work in this field covers the history of important conceptual issues in archaeology in such a deep and knowledgeable way bringing both philosophical and archeological sophistication to bear on all of the issues treated Wylie's work in *Thinking from Things* is original, scholarly, and creative. This book is for anyone who wants to understand contemporary archaeological theory, how it came to be, as it is, its relationship with other disciplines, and its prospects for the future. Merrilee Salmon, author of *Philosophy and Archaeology*. Wylie is a reasonable and astute thinker who lucidly and persuasively makes genuinely constructive criticisms of archaeological thought and practice and very useful suggestions for how to proceed. She commands both philosophy and archaeology to an unusual degree. Having her articles together in *Thinking from Things* with much new material, extending and integrating them, is a major contribution that will be widely welcomed among archaeologists, both professionals and students, philosophers and historians of science, and social scientists. George L. Cowgill, Arizona State University *Reader in Archaeological Theory* David S. Whitley, 1998 This *Reader in Archaeological Theory* presents sixteen articles of key theoretical significance in a format which makes this notoriously complex area easier for students to understand. This volume provides an intellectual history of different approaches to archaeology which contextualizes the complex traditions of cognitive archaeology and postprocessualism on which it focuses, organizes theories of archaeology, the meanings of things, the prehistoric mind and cognition, gender ideology, and social theory, and archaeology's relationship to today's society and politics. Includes lucid section introductions to each section which provide context, explain why the papers are so significant, and summarize their key points. Emphasizes research from the New World, making archaeological theory especially relevant and accessible to students in North America Metaarchaeology Lester Embree, 2012-12-06 An idea of the philosophy of archaeology can best be gained by showing what it is, what the issues are, who is working in the field, and how they proceed. Reading Lester Embree's *Metaarchaeology* provides the best possible introduction to the field, since in it several leading archaeologists show how accessible and interesting the current archeological literature is, and currently active philosophers of archaeology reveal something of the current state of discussion on the subject. Bibliographies have also been developed of the philosophy of archaeology as well as of selected parts of the component that can be called metaarchaeology. Finally, an historical introduction has been included to show the variety of metascientific as well as orientational standpoints that philosophers of archaeology have had recourse to for over two decades, followed by speculation about the future of the discipline within the philosophy of science **Facts on the Ground** Nadia Abu El-Haj, 2008-06-24 Archaeology in Israel is truly a national obsession, a practice through which national identity and national rights have long been asserted. But how and why did archaeology emerge as such a pervasive force there? How can the practices of

archaeology help answer those questions In this stirring book Nadia Abu El Haj addresses these questions and specifies for the first time the relationship between national ideology colonial settlement and the production of historical knowledge She analyzes particular instances of history artifacts and landscapes in the making to show how archaeology helped not only to legitimize cultural and political visions but far more powerfully to reshape them Moreover she places Israeli archaeology in the context of the broader discipline to determine what unites the field across its disparate local traditions and locations Boldly uncovering an Israel in which science and politics are mutually constituted this book shows the ongoing role that archaeology plays in defining the past present and future of Palestine and Israel

Heritage Studies Marie Louise Stig Sørensen, John Carman, 2009-09-18 This is the first volume specifically dedicated to the consolidation and clarification of Heritage Studies as a distinct field with its own means of investigation It presents the range of methods that can be used and illustrates their application through case studies from different parts of the world including the UK and USA The challenge that the collection makes explicit is that Heritage Studies must develop a stronger recognition of the scope and nature of its data and a concise yet explorative understanding of its analytical methods The methods considered fall within three broad categories textual discourse analysis methods for investigating people's attitudes and behaviour and methods for exploring the material qualities of heritage The methods discussed and illustrated range from techniques such as text analysis interviews participant observation to semiotic analysis of heritage sites and the use of GIS Each paper discusses the ways in which methods used in social analysis generally are explored and adapted to the specific demands that arise when applied to the investigation of heritage in its many forms Heritage Studies is a seminal volume that will help to define the field The global perspective and the shared focus upon the development of reflexive methodologies ensure that the volume explores these central issues in a manner that is simultaneously case specific and of general relevance

From Primitives to Primates David Van Reybrouck, 2012 Where do our images about early hominids come from In this fascinating in depth study David Van Reybrouck demonstrates how input from ethnography and primatology has deeply influenced our visions about the past from the 19th century to this day often far beyond the available evidence Victorian scholars were keen to look at contemporary Australian and Tasmanian aboriginals to understand the enigmatic Neanderthal fossils Likewise today's primatologists debate to what extent bonobos baboons or chimps may be regarded as stand ins for early human ancestors The belief that the contemporary world provides living links still goes strong Such primate models Van Reybrouck argues continue the highly problematic comparative method of the Victorian times He goes on to show how the field of ethnoarchaeology has succeeded in circumventing the major pitfalls of such analogical reasoning A truly interdisciplinary study this work shows how scholars working in different fields can effectively improve their methods for interpreting the deep past by understanding the historical challenges of adjacent disciplines Overviewing two centuries of intellectual debate in fields as diverse as archaeology ethnography and primatology Van Reybrouck's book is one long plea for trying to

understand the past on its own terms rather than as facile projections from the present David Van Reybrouck Bruges 1971 was trained as an archaeologist at the universities of Leuven Cambridge and Leiden Before becoming a highly successful literary author The Plague Mission Congo he worked as a historian of ideas For more than twelve years he was co editor of Archaeological Dialogues In 2011 12 he held the prestigious Cleveringa Chair at the University of Leiden *The Philosopher's Index* ,1992 Vols for 1969 include a section of abstracts *Boston Studies in the Philosophy of Science* Lester Embree,1992 **JOURNAL OF ARCHAEOLOGICAL SCIENCE. VOL. 19, NO. 1-6, 1992.** KARL BUTZER, EDITOR,1992

Indian Archaeology in Retrospect: Archaeology and historiography: history, theory, and method S. Settar,Ravi Korisetar,2002 Contributed articles **Rediscovering Our Past** Jonathan E. Reyman,1992 This collection of essays examines the history of American archaeology in terms of some of the major figures and internal and external forces that shaped its development The importance of using the vast array of unpublished materials in writing the history of archaeology is stressed as is the need for examining more closely the important contributions of women particularly in the period up to and immediately after World War II Finally the role of institutions in the development of American archaeology is also examined both for their progressive and regressive attributes Sussex Archaeological Collections, Relating to the History & Antiquities of the County Sussex Archaeological Society,1998 *Holocene Human Adaptations in the Missouri Prairie-Timberlands* ,1995 **Sussex Archaeological Collections Relating to the History and Antiquities of the County** Sussex Archaeological Society,1998 **Essential Tensions in Archaeological Method and Theory** Todd L. VanPool,Christine S. VanPool,2003 Archaeological theory some say seems to have fragmented into a thousand fundamentalisms By working on a broader set of empirical issues than ever before archaeologists are indeed applying and refining a variety of perspectives Yet the editors of this volume make a case that it is appropriate for archaeologists to use a logical variety of theoretical structures to answer different kinds of questions combining approaches as necessary In that spirit of plurality contributors to this volume identify an important theoretical or methodological problem and present an argument regarding its solution They also provide a critical evaluation of the current state of archaeological method and theory illustrating that such recurrent issues as the role of agency and the importance of social considerations in the formation of archaeological research dominate current theoretical development By presenting both the range of important questions and a variety of answers this volume contributes to the essential tension that will further the growth of archaeological theory Michigan Journal of Community Service Learning ,2003 The George Wright Forum ,1994 Between Bands and States Susan A. Gregg,1991
