Criticism In Action Enlightenment Experiments In Political Writing:

Criticism in Action Dena Goodman, 2019-05-15 Dena Goodman here offers a fresh explanation of how critical theory broke out of the mold of an earlier tradition of discourse the mirror for princes genre and shaped its own course in the eighteenth century *Criticism in Action* provides a historical analysis of French Enlightenment texts as actions and as the focus of critical activity in which writers and their potential readers participate Goodman approaches texts as forces that shape the thinking and acting of the individuals engaged in the act of reading and presents new interpretations of major Enlightenment texts by Montesquieu Rousseau and Diderot

Reviewing Political Criticism Elisabeth K. Chaves, 2016-04-08 *Reviewing Political Criticism* examines the rise of the review form of journal publication from the early eighteenth to the early twenty first centuries The review belongs to a long tradition of written political criticism that first advised then revised and with the increased confidence afforded to civil society by the rise of market capitalism subsequently challenged and even transformed the state's view on what and how it governed Chaves investigates the crucial nexus of intellectual debate with political judgment over this time and highlights the review's central role in upholding this connection Focusing upon critical moments that required the exercise of political judgment the book explains this journal form as a means of political practice one that essentially re-views the state's view of how society should be ordered To understand critical activity one must reflect on where this activity takes place on the institutions of criticism that sustain it Referred to by some as the natural habitat of intellectuals journals as the institutionalized sites of theoretical discourse are often overlooked This groundbreaking book offers a concentrated critique of the review form of journal publication as a medium for political thought and action as a decisive site for political judgment by the state's conservers and critics

[Commerce and Its Discontents in Eighteenth-Century French Political Thought](#) Anoush Fraser Terjanian, 2013 This book uncovers the ambivalence towards commerce in eighteenth century France questioning the assumption that commerce was widely celebrated in the era of Adam Smith

[The Power of Writing in Organizations](#) Anne-Laure Fayard, Anca Metiu, 2013 This book demonstrates the power of writing in informal and formal organizations in the past and the present It shows how writing despite long lasting criticisms that can be traced back to Plato and in spite of its frequent definition as a mere recording medium is in fact a creative mode of communication that supports the expression of emotions the developing knowledge and the building of strong communities among faraway individuals The first part of the book illustrates how this has been true historically The focus on writing as a fundamental mode of communication the other being speech or the oral mode is still important in our technology infused world where writing seems to have been reduced to short cryptic text messages or tweets Precisely because of their heavy reliance on technology current practices are in need of a deeper understanding that focus on deep as opposed to surface features and unveil the four essential mechanisms objectification reflecting specifying and addressing that give writing its creative powers In the second part of the book we use contemporary case studies and interviews to illustrate how shifting our

focus from the media to the mode of communication and focusing on the mechanisms of writing allows us to go beyond current debates about the capabilities of various communication media and to understand better today's communicative practices This book is an attempt to unveil the powers of writing as well as to highlight the implications for organizations of the potential loss of these powers in today's world where writing based distributed collaborations interpersonal relationships and online communities are key sources of innovation and support for individuals and organizations

History of Jewish Philosophy Daniel H. Frank, Oliver Leaman, 2003 The History of Jewish Philosophy explores the entire scope and variety of Jewish philosophy from philosophical interpretations of the Bible right up to contemporary Jewish feminist and postmodernist thought

Intellectuals and Public Life Leon Fink, Stephen T. Leonard, Donald Reid, 1996 Combining history with social theory this book offers a bold reassessment of the role of radical intellectuals in public life It explores the potential impact of intellectuals working for social and political change and is important for everyone concerned with such contemporary issues as the future of higher education the transformation of the public intellectual in Western and non Western societies the collapse of socialism and the paralysis of liberalism Illuminating many facets of the relationship between the life of the mind and the life of action these interdisciplinary essays consider diverse aspects of the role of intellectuals in revolutionary movements state centered reforms and colonial and postcolonial settings After discussions of how the intellectual as a social type has acquired its politically charged character chapters are devoted to radical thinkers in England Germany Russia and France The place of intellectuals in the United States is explored in essays on Progressive liberalism labor reform women's rights and the work of W E B Du Bois The book concludes with essays on the significance of liberation theology and the ideology of the Chinese student protest movement of 1989

A Conceptual Guide to the Political Present Khristina Hamilton Haddad, 2003

The Brokered World Simon Schaffer, 2009 Collection of essays focusing on the roles of intermediaries such as brokers and spies messengers and translators missionaries and entrepreneurs in linking different parts of the ever more densely entangled systems of knowledge production and circulation at a key moment in the development of global scientific commercial and political systems The period 1770 1820 was decisive for the reformation of imperial projects in the wake of military catastrophe and politico economic crisis both in the Atlantic and the Asian Pacific spheres economic and political worlds dominated by complex trade systems and violent contest This conjuncture also saw the overhaul of networks and institutions of natural knowledge whether commercial voluntary or organs

of state Both the industrial and the second scientific revolutions have been dated to this moment New and decisive relations were forged between different cultures knowledge carriers The authors consider knowledge movements of the epoch that escape simple models of metropolitan centre and remote colonial periphery They question the immutable character of mediators and agents in knowledge communication

Women and Medicine in the French Enlightenment Lindsay Blake Wilson, 1993 In *Women and Medicine in the French Enlightenment* Lindsay Wilson takes a new approach to the social history of medicine by focusing on the key role that women played as both providers and recipients of health care during the Ancien Regime Wilson pays special attention to three medical controversies involving *maladies des femmes* in eighteenth century France the miraculous cures claimed by the Convulsionaries of St Medard the uncertainty over the maximum length of pregnancy and its implications for the legitimacy of heirs and the debate over the medical effectiveness of mesmerism Wilson's analysis of these debates reveals how social and political concerns affected the medical community's efforts to establish an enlightened science of medicine which would in turn legitimize its own authority But because the issues of legitimacy hierarchy and authority raised by the medical causes celebres resonated so deeply throughout French society debate extended far beyond medical circles to an increasingly engaged public Such debate reflected a significant shift in the center of politics from the institutions of court academy and parlement to journals theaters and the streets Wilson's description of these debates provides insight into the forces that were transforming the family the church corporate society and the state on the eve of the Revolution She argues for a re assessment of a period that has been all too easily categorized as an age of triumph either for enlightenment or for repression Her work also offers concrete examples of the ways in which sexual symbolism can be employed to maintain social order or promote change Based on medical treatises medical topographies official reports judicial documents physicians correspondence and memoirs of eighteenth century women *Women and Medicine in the French Enlightenment* is a thoroughly interdisciplinary work that will appeal to anyone with an interest in the social history of medicine women's studies Enlightenment thought and French social history
