

## New Criticism

The foundations of the New Criticism were laid in books and essays written during the 1920s and 1930s by I. A. Richards (*Practical Criticism* [1929]), William Empson (*Seven Types of Ambiguity* [1930]), and T. S. Eliot ("The Function of Criticism" [1933]). The approach was significantly developed later, however, by a group of American poets and critics, including R. P. Blackmur, Cleanth Brooks, John Crowe Ransom, Allen Tate, Robert Penn Warren, and William K. Wimsatt. Although we associate the New Criticism with certain principles and terms—such as *affective fallacy* (the notion that the reader's response is relevant to the meaning of a work) and *intentional fallacy* (the notion that the author's intention determines the work's meaning)—the New Critics were trying to make a cultural statement rather than to establish a critical dogma. Generally southern, religious, and culturally conservative, they advocated the inherent value of literary works (particularly of literary works regarded as beautiful art objects) because they were sick of the growing ugliness of modern life and contemporary events. Some recent theorists even link the rising popularity after World War II of the New Criticism (and other types of formalist literary criticism such as the Chicago School) to American isolationism. These critics tend to view the formalist tendency to isolate literature from biography and history as symptomatic of American fatigue with wider involvements. Whatever the source of the New Criticism's popularity (or the reason for its eventual decline), its practitioners and the textbooks they wrote were so influential in American academia that the approach became standard in college and even high school curricula through the 1960s and well into the 1970s.

The Cambridge History of American Literature: Volume 5, Poetry and Criticism, 1900-1950 Sacvan Bercovitch, Cyrus R.

K. Patell, 1994 Multi volume history of American literature      An Analysis of T.S. Eliot's The Sacred Wood Rachel

Teubner, 2017-07-05 The essay for which The Sacred Wood is primarily remembered is one of the most famous pieces of criticism in English Tradition and the Individual Talent helped to re orientate arguments about the study of literature and its production by redefining the nature of tradition and the artist's relation to it At a time when the word traditional had become a way of damning with faint praise by reference to the past Eliot reinterpreted the term to mean something entirely different It is not he argues something just handed down but instead a prize to be obtained by great labour not least in the making of a huge effort of understanding how the past fits together Seen thus Eliot suggests a literary and artistic tradition has a simultaneous existence and composes a simultaneous order and it is not just past but present as well For Eliot art never improves but only changes and each part of the tradition is constantly being reinterpreted in light of what is added to the whole The role of the poet in Eliot's view is to subjugate their own personality and become a receptacle in which numberless feelings phrases images can unite to form a new compound Redefining the issue of poets relations to the past in this new way is a fine example of creative thinking and Eliot's ability to connect existing concepts in new ways was what gave weight to the argument that he advanced that poets cannot succeed without understanding that they are taking their place on a continuum that stretches back to all their predecessors and incorporate the ideas strengths and failings of the entire body of work that those poets represented      **Feminist Criticism and Social Change (RLE Feminist Theory)** Deborah

Rosenfelt, Judith Newton, 2013-05-20 This lively and controversial collection of essays sets out to theorize and practice a materialist feminist criticism of literature and culture Such a criticism is based on the view that the material conditions in which men and women live are central to an understanding of culture and society It emphasises the relation of gender to other categories of analysis such as class and race and considers the connection between ideology and cultural practice and the ways in which all relations of power change with changing social and economic conditions By presenting a wide range of work by major feminist scholars this anthology in effect defines as well as illustrates the materialist feminist tendency in current literary criticism The essays in the first part of the book examine race ideology and the literary canon and explore the ways in which other critical discourse such as those of deconstruction and French feminism might be useful to a feminist and materialist criticism The second part of the book contains examples of such criticism in practice with studies of individual works writers and ideas An introduction by the editors situates the collected essays in relation both to one another and to a shared materialist feminist project Feminist Criticism and Social Change demonstrates the important contribution of materialist feminist criticism to our understanding of literature and society and fulfils a crucial need among those concerned
