Boeselager, 2012-12-06 The first of the people to be thanked for their help during the composition of this work is Professor I M Bochenski under whom I had the good fortune to study for an extended period of time Without his help it is doubtful that this work would have been written at all Among the other professors who helped along the way I would like to cite in particular Professors A F Utz M D Philippe and N Luyten of the University of Fribourg Many friends were present at the birth of the ideas contained in this book By naming K G Ballestrem T L Blakeley and M F Gager I do not want to slight any of the rest It was A Spiekermann in Hollinghofen who saw to it that other preoccupations did not rob me of all the time needed for the study of the subject matter and to the composition of this treatise Of particular help in getting sources from the libraries of the world were Miss Lifschitz of the Institute of East European Studies and Mr Uldry of the Cantonal Library in Fribourg Switzerland Finally my patient typist Mrs Frey in Munster deserves special mention for her beautiful work *An Examination of Logical Positivism* Julius Rudolph Weinberg, 2013-12-19 First published in 2000 This is Volume II of six in the Library of Philosophy series on the Philosophy of Science Written in 1938 philosophical systems which employ logical methods almost exclusively would undoubtedly be expected to produce non empirical results If however logic is taken simply as a method of connecting meanings it is not difficult to reconcile logical methods with empirical results If logical formulas in other words assert nothing about the meanings of propositions but simply show how such meanings are connected then an empiricism based on a logical analysis of meanings is not inconsistent This is what the Logical Positivists have attempted to do This book looks at two areas the foundations of a scientific method free from metaphysics and the elimination of pseudo concepts introduced by metaphysics into science and philosophy **Logical Positivism** A.J. Ayer, 1966 Edited by a leading exponent of the school this book offers in the words of the movement's founders logical positivism's revolutionary theories on meaning and metaphysics the nature of logic and mathematics the foundations of knowledge the content of psychological propositions ethics sociology and the nature of philosophy itself **The Contemporary Critique Of Positivism: The Issues of Replicability and**

Universality Uğur Berk Kalelioğlu, 2020-06-10 The aim of this book is to critically discuss the validity of replicability and universality principles of positivism from a sociological perspective The main critiques of contemporary positivism are given by the schools of thought represented by multifarious thinkers The critique of positivist sociology which confirms itself based on continuous replication and aims to reach universal laws is given and the validity of replicability principle from the sociological point of view is discussed The discussion begins with brief premises of classical positivism proceeds to contemporary critique of logical positivism and is complemented by the post 2010 Replication Crisis The particular emphasis is given to the Replication Crisis and the reasons why replication studies are rare in sociology are discussed As a result of the study it is concluded that positivist claims replication and universality principles lose their validity in sociology due to ontological epistemological individual and structural aspects *Logical Positivism and Analysis* Lizzie Susan Stebbing, 1935

Logical Positivism and Analysis L. Susan Stebbing, 1974-09 **Reason and Analysis** Brand Blanshard, 2014-06-03 This is Volume II in a series of seventeen on Metaphysics Originally published in 1962 The Muirhead Library of Philosophy was designed as a contribution to the History of Modern Philosophy under the heads first of Different Schools of Thought Sensationalist Realist Idealist Intuitivist secondly of different Subjects Psychology Ethics Political Philosophy and Theology

The Limits of Logical Empiricism Alfons Keupink, Sanford Shieh, 2006-03-30 Arthur Pap's work played an important role in the development of the analytic tradition This role goes beyond the merely historical fact that Pap's views of dispositional and modal concepts were influential As a sympathetic critic of logical empiricism Pap like Quine saw a deep tension in logical empiricism at its very best in the work of Carnap But Pap's critique of Carnap is quite different from Quine's and represents the discovery of limits beyond which empiricism cannot go where there lies nothing other than intuitive knowledge of logic itself Pap's arguments for this intuitive knowledge anticipate Etchemendy's recent critique of the model theoretic account of logical consequence Pap's work also anticipates prominent developments in the contemporary neo Fregean philosophy of mathematics championed by Wright and Hale Finally Pap's major philosophical preoccupation the concepts of necessity and possibility provides distinctive solutions and perspectives on issues of contemporary concern in the metaphysics of modality In particular Pap's account of modality allows us to see the significance of Kripke's well known arguments on necessity and apriority in a new light **The New Republic** Herbert David Croly, 1908 *Critique of*

Patriarchal Reason Arthur Evans, 1997 A philosopher and an artist join hands in this book to reclaim philosophy as an art Their book shows how patriarchal biases have infected formal logic higher mathematics and the scientific method It demonstrates the harmful impact of these biases on women gay people artists indigenous societies and the natural environment Among the many thinkers discussed is Ludwig Wittgenstein A surprising connection is uncovered between Wittgenstein's theories of logic and language on one hand and his conflicted attitude toward his homosexuality on the other adapted from back cover **A Criticism of Logical Positivism** Edward W. Schott, 1956 *Twentieth-Century Philosophy*

Morris Weitz,1966 From Simon Schuster and edited by Morris Weitz 20th Century Philosophy The Analytic Tradition is a collection of readings in the history of philosophy The full scope and impact of Western philosophy from the Presocratics to the important thinkers of the twentieth century are presented in this original paperback series **Logical analysis and history of philosophy** ,2004 *Nursing Research, Holism, and Philosophies of Science* Francelyn Reeder,1986 Inside the Great Mirror James K.
