Wildlife Ethics Clare Palmer, Bob Fischer, Christian Gamborg, Jordan Hampton, Peter Sandoe, 2023-08-08 Wildlife Ethics A systematic account of the ethical issues related to wildlife management and conservation. Wildlife Ethics is the first systematic book-length discussion of the ethics of wildlife conservation and management and examines the key ethical questions and controversies. Tackling both theory and practice, the text is divided into two parts. The first describes key concepts, ethical theories, and management models relating to wildlife; the second puts these concepts, theories, and models to work, illustrating their significance through detailed case studies on controversies in wildlife management and conservation. The book explores pressing topics including human responsibilities due to climate change, tradeoffs when managing zoonotic disease risks, the ethics of the wildlife trade, culling non-native species, indigenous wildlife use, and zoo-based conservation programs. Readers are encouraged to explore different ways of valuing wild animals and their practical implications. This essential text explains and explores relationships between valuing biodiversity, human utility, ecosystems, species, and animal welfare. Describes established approaches to wildlife management such as sustainable use and emerging concepts such as compassionate conservation. Discusses key ethical theories including utilitarianism, ecocentrism, and animal rights. Offers a practical model of how to analyze ethical issues in wildlife management and conservation. Wildlife Ethics: The Ethics of Wildlife Management and Conservation is an accessible introduction to complex ethical issues, making the book an important resource for students in fields such as conservation biology, ecology, environmental science, and policy, game management, public health, and veterinary medicine. It will also be an invaluable tool for wildlife managers, conservationists, One Health practitioners, practicing veterinarians, and animal rehabilitation staff, contemporary wildlife professionals, and other stakeholders.

The Inhuman Empire Sadhana Naithani, 2024-05-20 This book is a study of selected texts of British writings on Indian wildlife published between 1860 and 1960. Set in the context of British colonial rule in India, this book also reflects on similar situations across the British Empire and other colonial empires. The destruction of wildlife in the making of empires is a subject not yet fully explored in scholarship. This book aims to speak to global concerns regarding the extinction of several species and shows that the crisis has international roots. The Inhuman

Empire breaks new grounds as it juxtaposes colonial narratives to folk narratives These two types of narratives treat nonhuman animals very differently folk narrative considers them sentient beings while colonial narratives see them as game and do not care for their sentience Both types of narratives are further evaluated with reference to the contemporary position of natural sciences regarding animal sentience and of anthropologists and philosophers regarding the relationship between nature and culture Analyzing colonial accounts of hunting the author looks at the pain and suffering of nonhuman animals and combines statistics alongside narratives of British writers Indian populace and nonhuman animals in order to show narratives reflect and impact reality This book will be of great value to those interested in Animal Studies Folkloristics the history of Colonialism and India **Crocodiles** ,1972 *In Crocodile Land* Ion Idriess,2022-06-01 In Crocodile Land is principally the story of travels by lugger through northern waters and into slimy creeks where the huge crocodiles abound The author took part in many hunting expeditions and enlightens us on the various methods adopted for catching these fearsome creatures The party had more than a little success to the great glee of the blackfellows who accompanied them We journey next into the country of the buffaloes Here on sunlit clearings through thickets of pandanus palms the buffaloes were to be found in hundreds There is plenty of risk in hunting the buffalo Once the shooting starts the horse must continue his gallop faster than the buffaloes and alongside them keeping them going One stumble and the end is near for horse and rider Western Mail Perth 1946 Although it has the thrill of crocodile shooting and trapping as its central theme the book also affords a sympathetic and fascinating study of the aborigines and their tribal customs slants on the dangerous sport of buffalo hunting and vivid pen pictures of Wyndham Darwin and other far northern towns Adelaide Advertiser 1946 Introduced by Tony McKenna **New York State Journal of Medicine** ,1927 **The Golden Bough** James George Frazer,1922 American Photo ,2000-11 **English Mechanics** ,1923 *The Encyclopædia of Sport & Games: Crocodile shooting - Hound breeding* ,1912 **Wildlife Tourism, Environmental Learning and Ethical Encounters** Ismar Borges de Lima,Ronda J.
