Antelopes David P. Mallon, Steven Charles Kingswood, 2001 Antelope herds numbering in the tens of thousands formerly occurred across the steppes and semideserts of Eurasia and India but these have nearly all been reduced to fractions of their earlier size antelope populations are now fragmented across the region and during recent decades several species have disappeared altogether Threats include hunting loss of habitat population fragmentation inadequate protected area coverage poorly developed administrative structures under resourcing of conservation programmes and lack of enforcement of existing legislation Rising human population growth and economic development constantly increases pressure on land and natural resources There is a consequent need for integrated rural development and community based conservation projects which have the full participation of local people at the planning and execution stages This publication Part 4 of the Global Antelope Survey covers 37 countries in the region and actions to conserve antelope populations are listed in each country report
