## **Cross Currents Interactions Between Science Faith:**

**Cross-Currents** Colin A. Russell, **Science, Faith, and Ethics** Denis Alexander, Robert S. White, 2006 Does religion belong in the laboratory What relationship exists between science and Christian faith Are the two mutually exclusive Arguing that Christianity has much to contribute to the scientific and ethical debates facing today's world gifted scientists and committed Christians Alexander and White ask the hard questions as they examine some of the greatest scientific and ethical challenges of the age Topics include the new genetics reproductive technologies cloning the significance of evolution the environment and climate change and sustainable consumption from publisher information **Science, Religion, and the Search for Extraterrestrial Intelligence** David Wilkinson, 2013-08-02 If the discovery of life elsewhere in the universe is just around the corner what would be the consequences for religion Would it represent another major conflict between science and religion even leading to the death of faith Some would suggest that the discovery of any suggestion of extraterrestrial life would have a greater impact than even the Copernican and Darwinian revolutions It is now over 50 years since the first modern scientific papers were published on the search for extraterrestrial intelligence SETI Yet the religious implications of this search and possible discovery have never been systematically addressed in the scientific or theological arena SETI is now entering its most important era of scientific development New observation techniques are leading to the discovery of extra solar planets daily and the Kepler mission has already collected over 1000 planetary candidates This deluge of data is transforming the scientific and popular view of the existence of extraterrestrial intelligence Earth like planets outside of our solar system can now be identified and searched for signs of life Now is a crucial time to assess the scientific and theological questions behind this search This book sets out the scientific arguments undergirding SETI with particular attention to the uncertainties in arguments and the strength of the data already assembled It assesses not only the discovery of planets but other areas such as the Fermi paradox the origin and evolution of intelligent life and current SETI strategies In all of this it reflects on how these questions are shaped by history and pop culture and their relationship with religion especially Christian theology It is argued that theologians need to take seriously SETI and to examine some central doctrines such as creation incarnation revelation and salvation in the light of the possibility of extraterrestrial life

**Perspectives on Science and Christian Faith**, 2002 **Perspectives on Science and Christian Faith** American Scientific Affiliation, 1987 **Science, Technology, and Society** Sal Restivo, 2005-05-19 Emphasizing an interdisciplinary and international coverage of the functions and effects of science and technology in society and culture Science Technology and Society contains over 130 A to Z signed articles written by major scholars and experts from academic and scientific institutions and institutes worldwide Each article is accompanied by a selected bibliography Other features include extensive cross referencing throughout a directory of contributors and an extensive topical index **The Cambridge History of Science: Volume 3, Early Modern Science** David C. Jeeves,Robert James Berry,1998 Science Life and Christian Belief is an overview of the two books of God nature and Scripture showing they give complementary descriptions of one single reality

**Science Meets Faith** Fraser N. Watts,1998 What do science and religion have to say to each other The contributors to this work all experts in science philosophy of science and theology believe that a constructive dialogue is not only possible but vitally important The book is a guide to this constantly evolving debate     Environment and Mental Health Stephen M. Williams,1994-11-29 Examining the link between the environment and mental health this study describes how environmental influences help clinicians and researchers to understand mental illness and disabilities It argues that the attention paid to environmental factors may af     Prospects in Systematics D. L. Hawksworth,Systematics Association,1988 This book critically reviews the developments and achievements of systematics in the 50 years since the foundation of the Systematics Association in 1937 and more particularly since the appearance of The New Systematics edited for the Association by Sir Julian Huxley in 1940 Botanists microbiologists palaeontologists and zoologists theoreticians and practitioners alike consider fundamental aspects of the subject and the directions in which it might develop into the next century The result is a description of a highly active subject adapting concepts and practices to accommodate exciting new information from expanding areas of research one which however also needs to take increased note of the requirements of its users The main challenge for systematics in the coming decades emerges as the need to re establish its central unifying position as the keystone of biology     Library Journal ,1985     **Library Journal** Melvil Dewey,Richard Rogers Bowker,L. Clouse,Richard V. Pierard,Edwin M. Yamauchi,1993 Three of today s foremost church historians have succeeded in producing an invaluable introduction to church history that focuses on the influence of the church on culture and the impact of society on the church A unique study that affirms that church history is not exclusively European or American but is truly a global story with global significance     Science and Religion Jeff Astley,David Brown,Ann Loades,2004 This reader brings together carefully selected material from a wide range of authors on the relationships between science religion and theology It samples the recent literature on the challenges to religion posed by both modern physics and evolutionary biology as well as exploring the relationship between scientific and theological approaches Topics include models of interaction between science and religion historical reflections on the conflict thesis scientific and theological methods creation and modern cosmology uncertainty and chaos creationism and evolutionary theory the anthropic principle and design and the challenge of reductionism Contributors include Ian Barbour Michael Behe Richard Dawkins John Habgood Mary Hesse T H Huxley Alister McGrath Arthur Peacocke John Polkinghorne Michael Ruse

Keith Ward and Fraser Watts      *Alone in the Universe?* David Wilkinson, 1997 What lies behind our curiosity about other life in the cosmos Analyzing popular interest in aliens from Star Wars to The X Files David Wilkinson carefully weighs the scientific arguments for space travel and extraterrestrial life And he explores the implications for Christian faith      Records  
Scottish Church History Society, 2002      *The Biblical Flood* Davis A. Young, 1995 Using the biblical flood as an example  
Young contends that the church has not always handled evidence well in grappling with scientific matters and issues a call to biblical scholars to interpret the Genesis text more rigorously in light of current scientific knowledge
