Didactica Multisensorial De Las Ciencias:

Didáctica multisensorial de las ciencias Miquel-Albert Soler, 1999-05-06 La didáctica multisensorial de las ciencias es una nueva divertida y motivadora forma de enseñar y aprender ciencias experimentales y de la naturaleza a través de todos los sentidos adaptable a cualquier nivel académico. Ha resultado ser un método válido tanto en alumnos ciegos y deficientes visuales como en alumnos sin problemas de visión por lo que es de gran interés tanto para la atención a la diversidad en el aula como en la incorporación de novedades más enriquecedoras y motivadoras en las clases habituales con alumnos sin problemáticas visuales. Si estudiamos los fenómenos naturales abriendo solo una ventana la de la vista obtendremos resultados sesgados si abrimos más ventanas en este estudio las de los demás sentidos obtendremos aprendizajes más significativos y enriquecedores. El libro consta de cuatro partes: el marco teórico que fundamenta el método, la descripción del método con un análisis del papel que tiene cada uno de los sentidos en el proceso de enseñanza aprendizaje de las ciencias con un compendio de experiencias y prácticas de laboratorios para cada uno de ellos, los recursos didácticos necesarios para llevar a cabo el método expuesto y una breve exposición de cómo se ha llegado a la generalización del método a través de la investigación acción. Como hacer audible la refracción de la luz, la propagación de las ondas o la absorción vegetal. Como hacer más comprensible el concepto del color para los niños ciegos. Como se hace un estudio multisensorial de los ecosistemas. Como hacer un estudio multisensorial de un río, de una tormenta o de la fotosíntesis. Como percibir el pH sin ver. Estas y otras muchas ideas se encuentran en este libro didáctico. Miquel-Albert Soler, doctor en Ciencias de la Educación por la Universidad de Barcelona y profesor. *Las didácticas inclusivas* Verónica Marín-Díaz, Noelia Jiménez Fanjul, 2019-11-06 El acto educativo se encuentra cargado y afectado por diversos elementos que hacen que en él sea necesaria la convergencia por el objetivo propio del proceso de enseñanza y aprendizaje y la divergencia de perfiles docentes y estudiantiles. La educación desde una perspectiva inclusiva. La práctica inclusiva que proponen estas páginas trata de poner de relieve a través de diferentes propuestas de innovación docente y de investigación que para que haya una educación con el foco puesto en la diversidad se debe no solo poner en marcha una política inclusiva eficaz sino que además la práctica de aula y la teoría educativa han de estar imbuidas por la búsqueda de la acción participativa de todos docentes discentes y administradores. En este sentido las diferentes perspectivas didácticas que giran en torno a la acción o la educación inclusiva ofrecen una perspectiva caleidoscópica de la formación de la persona de cara a su incorporación al tejido social en plenitud. Diferentes declaraciones y documentos internacionales como la Declaración de Salamanca de 1998 han evidenciado la necesidad de desarrollar una formación inclusiva creativa para lo cual hace falta brindar a la comunidad educativa oportunidades para poner en marcha dicha creatividad. Esta obra aborda la utilización de las TIC para la diversidad a partir del empleo de recursos como la realidad aumentada y desde materias tan peculiares como las Matemáticas o la Física y la Química. Invitamos al lector a bucear en sus páginas en la búsqueda de su punto de interés. **Investigación educativa para los**

Televisión subliminal Joan Ferrés, 1996 No basta con tener espíritu crítico en general para saber ver la televisión de manera reflexiva No basta con educar en general para enseñar a ver la televisión Hace falta una enseñanza específica porque la mayor parte de los efectos socializadores de la televisión son de carácter subliminal La influencia de la televisión no se puede comprender aproximándose a ella desde los parámetros de la verbalidad de la racionalidad y de la conciencia parámetros en los que se mueven tanto la cultura oficial como los currículos y planes de enseñanza Tanto en el ámbito de la información como en el de la publicidad o en el del entretenimiento los efectos socializadores de la televisión solo pueden comprenderse desde el conocimiento de la lógica de sus emociones de los mecanismos del inconsciente y de las comunicaciones inadvertidas El presente libro pretende una aproximación a la televisión desde esta perspectiva conocer los mecanismos subliminales mediante los que la televisión ejerce su influencia socializadora Resultará útil pues para toda clase de educadores tanto escolares como de tiempo libre Pero también para los padres de familia y para todo aquel que en cuanto telespectador quiera conocer a fondo los efectos de la televisión
