Die Erben Roms:

Merovingian Mortuary Archaeology and the Making of the Early Middle Ages Bonnie Effros, 2003-03-03 Clothing jewelry animal remains ceramics coins and weaponry are among the artifacts that have been discovered in graves in Gaul dating from the fifth to eighth century Those who have unearthed them from the middle ages to the present have speculated widely on their meaning This authoritative book makes a major contribution to the study of death and burial in late antique and early medieval society with its long overdue systematic discussion of this mortuary evidence Tracing the history of Merovingian archaeology within its cultural and intellectual context for the first time Effros exposes biases and prejudices that have colored previous interpretations of these burial sites and assesses what contemporary archaeology can tell us about the Frankish kingdoms Working at the intersection of history and archaeology and drawing from anthropology and art history Effros emphasizes in particular the effects of historical events and intellectual movements on French and German antiquarian and archaeological studies of these grave goods Her discussion traces the evolution of concepts of nationhood race and culture and shows how these concepts helped shape an understanding of the past Effros then turns to contemporary multidisciplinary methodologies and finds that we are still limited by the types of information that can be readily gleaned from physical and written sources of Merovingian graves For example since material evidence found in the graves of elite families and particularly elite men is more plentiful and noteworthy mortuary goods do not speak as directly to the conditions in which women and the poor lived The clarity and sophistication with which Effros discusses the methods and results of European archaeology is a compelling demonstration of the impact of nationalist ideologies on a single discipline and of the struggle toward the more pluralistic vision that has developed in the post war years

Cognitive Modeling and Verbal Semantics Andrea C. Schalley, 2011-05-03 This book presents a unique approach to the semantics of verbs It develops and specifies a compositional representation framework for verbal semantics that is based on the Unified Modeling Language UML the graphical lingua franca for the design and modeling of object oriented systems in computer science The new framework combines formal precision with conceptual flexibility and allows the representation of very complicated details of verbal meaning using a mixture of graphical elements as well as linearized constructs Thereby it offers a solution for different semantic problems such as context dependency and polysemy The latter for instance is demonstrated in one of the two well elaborated applications of the framework within this book the investigation of the polysemy of German setzen Besides the formal specification of the framework the book comprises a cognitive interpretation of important modeling elements discusses general issues connected with the framework such as dynamic and static aspects of verbal meanings questions of granularity and general constraints applying to verbal semantics Moreover first steps towards a compositional semantics are undertaken and a new verb classification based on this graphical approach is proposed Since the framework is graphical in nature the book contains many annotated figures and the framework's modeling elements are illustrated by

example diagrams Not only scholars working in the field of linguistics in particular in semantics will find this book illuminating because of its new graphical approach but also researchers of cognitive science computational linguistics and computer science in general will surely appreciate it

Emotions in Crosslinguistic Perspective Jean Harkins, Anna Wierzbicka, 2010-12-14 This volume aims to enrich the current interdisciplinary theoretical discussion of human emotions by presenting studies based on extensive linguistic data from a wide range of languages of the world Each language specific study gives detailed semantic descriptions of the meanings of culturally salient emotion words and expressions offering fascinating insights into people's emotional lives in diverse cultures including Amharic Chinese German Japanese Lao Malay Mbula Polish and Russian The book is unique in its emphasis on empirical language data analyzed in a framework free of ethnocentrism and not dependent upon English emotion terms but relying instead on independently established conceptual universals Students of languages and cultures psychology and cognition will find this volume a rich resource of description and analysis of emotional meanings in cultural context
