Die Logik Der Dichtung:

Die Logik der Dichtung Käte Hamburger, 1977 **A History of Poetics** Sandra Richter, 2010 Since the 1990s following the end of postmodernism literary theory has lost much of its dynamics This book aims at revitalising literary theory exploring two of its historical bases German poetics and aesthetics Beginning in the 1770s and ending in the 1950s the book examines nearly 200 years of this history thereby providing the reader with a first history of poetics as well as with bibliographies of the subject Particular attention is paid to the aesthetics and poetics of popular philosophy of the Hegel school empirical and psychological tendencies in the field since the 1860s the first steps towards a plurality of methods 1890 1930 theoretical confrontations during the Nazi period as well as the rise of formalist and anthropological approaches from the 1930s onwards All approaches are evaluated regarding their relevance for academia as well as for the general history of education If possible international references and contexts of the relevant theories are taken into account In sum the analysis not only shows how differentiated historical accounts in the field were but also reflects how current literary theory could move forward through the rediscovery of sunken ideas **Käte Hamburger** Johanna Bossinade, Angelika Schaser, 2003

work point of view the relationship between narrator's text and character's text narrativity and eventfulness and narrative transformations of happenings The book outlines a theory of narration and analyses central narratological categories such as fiction mimesis author reader narrator etc A detailed bibliography and glossary of narratological terms make this book a compendium of narrative theory which is of relevance for scholars and students of all literary disciplines *Die Logik der Lyrik* Christian P. Narrative and Fantasy in the Post War German Novel a study of novels by Uwe Johnson Max Frisch Christa Wolf Jurek Becker and Günter Grass investigates the fictions and fantasies invented by five narrators examining the purpose which the fictions serve within each text and the means by which each author deliberately draws attention to them All five authors are shown to be concerned with the kinds of stories which ordinary people tell about themselves and their past lives While some of the texts demonstrate the positive power of imagination others point to the dangers of fiction its tendency to falsify reality and to encourage escapist and violent fantasies This is the first major study of this distinctive trend in post war German fiction
