Ulfried Geuter

Die Professionalisierung Der Deutschen Psychologie Im Nationalsozialismus:

The Professionalization of Psychology in Nazi Germany Ulfried Geuter, 1992-10-30 The definitive work on the professionalization of psychology in Nazi Germany now translated from German **German Professions, 1800-1950** Geoffrey Cocks, Konrad Hugo Jarausch, 1990 A comprehensive view of 19th century German history is described in this study of the professions from law and medicine to engineering social work and psychology as well as the special cases of the civil service and the military **Die Professionalisierung der deutschen Psychologie im Nationalsozialismus** Ulfried Geuter, 1984 Science, Technology, and National Socialism Monika Renneberg, Mark Walker, 2003-09-25 This 1993 book provides a survey of the development of scientific disciplines and technical projects under National Socialism in Germany Each contribution addresses a different aspect which is important for judging the interaction between science technology and National Socialism In particular the personal conduct of individual scientists and engineers as well as the functionality of certain theories and projects are examined All essays share a common theme continuity and discontinuity All authors cover a period from the Weimar Republic to the post war period This unanimity of approach provides answers to major questions about the nature of Hitler's regime and about possible lines of continuity in science and technology which may transcend political upheaval The book is also the most comprehensive to date on this subject and includes essays on engineering geography biology psychology physics mathematics and science policy **Holocaust** Peter Longerich, 2010-04-15 In 1998 Longerich published *Politik der Vernichtung* Politics of Destruction a stunning reexamination of the Holocaust Now finally available in English this masterful history uses an unrivaled range of sources to lay out in clear detail the steps taken by the Nazis that would lead ultimately to the Final Solution **People's Community 1933 - 1945** Dieter Gessner, 2024-03-29 The author of this volume examines the historical development and popularization of the ideological concept of the Volksgemeinschaft This is a process of scientification which the author describes using the examples of sociology history economics demography psychology and geography Its result is an ideologically based construct of knowledge determined by Volkisch questions the Volksgemeinschaft The Content Ideology and science Updating modernization of the Volkisch ideology Hans Freyer's sociology of the Volkisch society German folk and cultural soil cultural space research Volkische race research dismissible or undeniable people and or race Volkische sciences Volk Volksgemeinschaft political catchword for an ideologically based knowledge construct The Target groups Lecturers students and practitioners from the fields of Sociology Political science History Cultural studies Psychology human medicine population science Cultural studies Law Economics Journalism The Author Dr Dieter Gessner is a journalist and historian **Psychology Science**, 2004 **The German Journal of Psychology**, 1989 *Psychologie im Nationalsozialismus* Carl Friedrich Graumann, 1985 **Die deutsche Religionswissenschaft und der Nationalsozialismus** Fritz Heinrich, 2002 **Science in the Third Reich** Margit Szöllösi-Janze, 2001-03 How true is it that National Socialism led to an ideologically distorted pseudo science What was the

relationship between the regime funding useful scientific projects and the scientists offering their expertise And what happened to the German scientific community after 1945 especially to those who betrayed and denounced Jewish colleagues In recent years the history of the sciences in the Third Reich has become a field of growing importance and the in depth research of a new generation of German scholars provides us with new important insights into the Nazi system and the complicated relationship between an elite and the dictatorship This book portrays the attitudes of scientists facing National Socialism and war and uncovers the continuities and discontinuities of German science from the beginning of the twentieth century to the postwar period It looks at ideas especially the Humboldtian concept of the university examines major disciplines such as eugenics pathology biochemistry and aeronautics as well as technologies such as biotechnology and area planning and it traces the careers of individual scientists as actors or victims The striking results of these investigations fill a considerable gap in our knowledge of the Third Reich but also of the postwar role of German scientists within Germany and abroad
