Crisis In Marxism:

Marx's Theory of Crisis Simon Clarke, 2016-07-27 The theory of crisis has always played a central role within Marxism and yet has been one of its weakest elements Simon Clarke's important new book provides the first systematic account of Marx's own writings on crisis examining the theory within the context of Marx's critique of political economy and of the dynamics of capitalism The book concentrates on the scientific interpretation and evaluation of the theory of crisis and will be of interest to mainstream economists as well as to sociologists political scientists and students of Marx and Marxism

The Crisis in Marxism Jack Lindsay, 1981 **Herbert Marcuse and the Crisis of Marxism** Douglas Kellner, 1984 Critical overview of the entirety of Marcuse's work and discusses his enduring importance Kellner had extensive interviews with Marcuse and provides hitherto unknown information about his road to Marxism his relations with Heidegger and Existentialism his involvement with the Frankfurt School and his reasons for appropriating Freud in the 1950s In addition Kellner provides a novel interpretation of the genesis and structure of Marcuse's theory of one dimensional society of the development of his political theory and of the role of aesthetics in his critical theory **Social Theory and the Crisis of Marxism** Joe McCarney, 1990 It is frequently asserted that Marxism as an intellectual tradition is in a state of crisis The many defeats and disappointments suffered by socialist movements in the West and the absence of a working model of a fully achieved socialist society have prompted much self questioning In recent times various strands of post Marxist thought have developed which surrender the ideological initiative to the radical right This philosophical reinterpretation of Marxism seeks to explain the nature and historical origins of the current crisis and to point a way forward to rebirth McCarney argues that there are neglected truths about Marxism which need urgently to be restated Rejecting the dominant interpretation that theory is essentially a critique of capitalist society he reaffirms the classical Marxist model in which socialist theory uncovering a rational order emergent within existing society reveals to the agents of socialist change their historical role McCarney's meticulous analysis systematically examines the relationship between theory critique and social agency to be found in classical Marxism in the work of such leading Marxists as Lukacs Adorno and Althusser and in the recent analytical realist accounts of Marxist theory The book concludes that theoretical as well as social or political advance depends upon the fate of the new proletarian movements and identifies the developments in philosophy and political economy which are needed to ensure that Marxism remains a living intellectual force in the contemporary world Marxism and the Global Financial Crisis Hillel Ticktin, 2013-09-13 The book discusses the nature of Marxist theory of crisis and applies it to the global financial crisis which began in 2007 Is the contemporary crisis simply the usual periodic upturn and downturn or is there something more fundamental Is there a structural crisis of capitalism from which there is no immediate solution Is capitalism managed and does it have a strategy Is the financial crisis representative of a failure in capitalism itself to subject banks and other financial institutions to the overall economy The book discusses Marx's view on crises as well as ideas on money and finance

It considers the different modern Marxist ideas on the causes of crises falling rate of profit disproportionality and underconsumption. It goes into detail as to the nature of the present crisis its course and causes in a spirited and independent manner. Apart from the United States it considers the situation in the two countries in which protests erupted Iran and Greece. They are taken as examples of the effect of the crisis on the country the society and the economy as well as its politics. This book was originally published as a special issue of Critique

Crisis and Change Today Peter Knapp, Alan Spector, 2011-01-16. Crisis and Change Today provides a solid introduction to Marxist social theory. The work's unique voice is expressed in its Socratic dialogic approach structured around forty questions that students have about society and social change. Topics range from theories of history economics unemployment racial oppression the state fascism the collapse of the Soviet bloc and points of convergence and difference between the dialectical approach and other approaches to social science. The content and tone of the work invites students to evaluate various traditional and current explanations of social institutions and social processes and encourages them to weigh the debates and investigate further. The first edition was very well received Distinguished Scholarship Award of the Section on Marxist Sociology of the ASA and the second edition has been thoroughly revised and updated to be relevant for students today. Though the first edition was written during the wake of the fall of the Berlin Wall and the collapse of the Soviet Union the growing gap between the rich and the poor and the economic crisis have generated more interest in using Marxist analysis both as a tool to analyze and understand capitalism and the weaknesses of past Marxist praxis

Classical Marxism in an Age of Capitalist Crisis William Briggs, 2019-03-14. Will capitalism survive forever? Capitalism has always lived in and with crisis Wars revolutions economic depression and repeated recessions the threat of nuclear annihilation and ecological disaster have all failed to break the dominance of this economic and political system. Challenging the predominance of capitalism in a world fraught with inequalities this book returns to classical Marxism to reaffirm its relevance. It explores the contradictions within capitalism as well as explains why Marxism has been unable to mount a sustained challenge to capitalism. In order to explore concrete alternatives in a period of increasing capitalist globalisation and crisis it goes on to present perspectives by which theory and practice might be reunited to building independent political and organisational structures. A search for something better this volume will be an engaging read for scholars and researchers of politics especially political theory and political economy economics and sociology

Global Capitalism in Crisis Murray E. G. Smith, 2010. The world economy is currently experiencing a devastating slump not seen since the Second World War. Unemployment rates are skyrocketing and salaries are plummeting in the developed world while astronomical food prices and starvation ravage the developing world. The crisis in global capitalism Smith argues should be understood as both a composite crisis of overproduction credit and finance and a deep seated systemic crisis. Using Marx to analyze the origins implications and scope of the current economic slump this book argues that the crisis needs to be understood structurally as the result of a system prone to crisis rather than as an

aberration Publisher's website **World in Crisis** Guglielmo Carchedi, Michael Roberts, 2018-10-01 Most mainstream economists view capitalism's periodic breakdowns as nothing more than temporary aberrations from an otherwise unbroken path toward prosperity For Marxists this fundamental flaw has long been acknowledged as a central feature of the free market system This groundbreaking volume brings together Marxist scholars from around the world to offer an empirically grounded defense of Marx's law of profitability and its central role in explaining capitalist crises World in Crisis has a specific aim to provide empirical validity to the hypothesis that the cause of recurring economic crises or slumps in output investment and employment in modern economies can be found in Marx's law of the tendential fall in the rate of profit Marx believed and we agree that this is the most important law in political economy from the preface [Class, Crisis and the State](#) Erik Olin Wright, 2016-03-01 One of the major works of the new American Marxism Wright's book draws a challenging new class map of the United States and other comparable advanced capitalist countries today It also discusses the various classical theories of economic crisis in the West and their relevance to the current recession and contrasts the way in which the major political problem of bureaucracy was confronted by two great antagonists Weber and Lenin A concluding essay brings together the practical lessons of these theoretical analyses in an examination of the problems of left governments coming to power in capitalist states [China And The Crisis Of Marxism-Leninism](#) Franz Michael, 2019-04-11 Is the failure of communism in China inevitable So argue the authors of China and the Crisis of Marxism Leninism who believe that Mao's programs were utopian fantasies that greatly aggravated the incurable flaws of the Stalinist order now eroding worldwide At the time of the death of Mao Zedong in 1976 China was in a state of disarray and the [Value, Technical Change and Crisis](#) David Laibman, 2016-09-16 This text brings together studies in various aspects of the theory of the capitalist economy It focuses on major themes of the Marxist tradition that postulate the existence and importance of social relations and structures underlying the esoteric realm of economic categories prices profits wages etc The author takes a reappraising critical look at the concepts of the deep structure value exploitation immanent crisis using the analytical tools of modern economics to improve those concepts The book is divided into four parts Part 1 explores the essential nature of capitalism re-examining problems in the theory of value and exploitation Part 2 tackles the issue of capitalism specific paths of growth and technical change putting forward a rigorous theory of biased technical change and non steady state growth Part 3 examines the cyclical character of capitalist growth and the theory of crises Finally Part 4 places capitalism in the wider framework of modes of production considering the theory of precapitalist formations and aspects of the theory and practical experience of socialism The guiding theme is the combination or confrontation of rigorous quantitative analytical techniques with equally demanding qualitative and political economic conceptualization The book's premise is that this interface is essential to a progressive yet distinctively Marxist social theory **The Crisis in Historical Materialism** S. Historical Materialism and the Economics of Karl Marx Benedetto Croce, 1914 It is often said that it is the business of philosophy to examine and criticise the assumptions of the sciences and philosophy claims that in this work it is not an unnecessary meddler stepping in where it is not wanted For time and again for want of philosophical criticism the sciences have overstepped their bounds and produced confusion and contradiction *Behind the Crisis* Guglielmo Carchedi, 2010-12-17 Drawing on modern philosophy of science epistemology economics and sociology this work retraces Marx's original multi disciplinary project and develops its foundations into a modern Marxist paradigm capable of understanding the present crisis and of challenging contemporary capitalism
