

Definition of a criterion-referenced test (2)

- *A student's score on a criterion-referenced measure provides explicit information as to what the student can and can't do. Criterion-referenced measures indicate the content of the behavioural repertory, and the correspondence between what an individual does and the underlying continuum of achievement. Measures which assess student achievement in terms of a certain criterion standard thus provide information as to the degree of competence attained by a particular student which is independent of reference to the performance of others.*
