## **Critical Decision Making A New Theory Of Social Choice:**

**Critical Decision Making** David Collingridge,1982      Changing Public Sector Values Montgomery Van Wart,2013-10-28 First Published in 1998 The single most important purpose of this book is to create a field of public administration values a field that currently does not exist in a recognizable form Surely values are discussed significantly and usefully by the fields of ethics management decision making and organization behavior and theory to mention only a few But these discussions are inevitably narrower in scope than is necessary for a true field of values Such a field is needed to help bridge the seeming chasm about discussions of values among the established fields A second purpose of this text is to provide a comprehensive treatment of values A third purpose of the text is to provide a balanced treatment giving all the major schools of thought roughly the same coverage so that their values can be compared as dispassionately as possible A fourth purpose of the book is to make the subject accessible to and interesting for practitioners and students      *Decisions, Technology and Organization* Audley Genus,2017-11-22 This title was first published in 2000 This text analyzes the problems of managing large scale technology projects It addresses the contrast between projects hoped for benefits and the optimism with which they are promoted and the high human economic or environmental costs of their operation The book is multi disciplinary in its approach and an integration of different levels of analysis It contains case studies that are analyzed in terms of the literatures on decision theory public administration and strategic and project management      **Rationality in Action** Paul K. Moser,1990-10-26 An anthology of previously published pieces that have proven long term importance to theoretical work in rational action      **History and Context in Comparative Public Policy** Douglas E. Ashford,2010-11-23 Douglas E Ashford joins a growing number of scholars who have questioned the behavioralist assumptions of much policy science The essays in this volume show why policy analysis cannot be confined to prevailing methods of social science Policy making behavior involves historical contextual and philosophical factors that also raise critical questions about the concepts and theory of the discipline Ashford asks difficult questions about the contextual conjunctural and unintentional circumstances that affect actual decision making His bridging essays summarize opposing viewpoints and conflicting interpretations to help form a new agenda for comparative policy analysis      The Routledge Handbook of Energy Security Benjamin K. Sovacool,2010-12-16 This Handbook examines the subject of energy security its definition dimensions ways to measure and index it and the complicating factors that are often overlooked The volume identifies varying definitions and dimensions of energy security including those that prioritize security of supply and affordability alongside those that emphasize availability energy efficiency trade environmental quality and social and political stewardship It also explores the various metrics that can be used to give energy security more coherence and also to enable it to be measured including recent attempts to measure energy security progress at the national level with a special emphasis placed on countries within the Organization of Economic Cooperation and Development OECD countries within Asia and industrialized countries

worldwide This Handbook Broadens existing discussions of energy security that center on access to fuels including oil security and coal security Focuses not only on the supply side of energy but also the demand taking a hard look at energy services and politics along with technologies and infrastructure Investigates energy security issues such as energy poverty equity and access and development Analyzes ways to index and measure energy security progress at the national and international level This book will be of much interest to students of energy security energy policy economics environmental studies and IR Security Studies in general

**Science and Citizens** Melissa Leach, Ian Scoones, Brian Wynne, 2008-02-29 Rapid advances and new technologies in the life sciences such as biotechnologies in health agricultural and environmental arenas pose a range of pressing challenges to questions of citizenship This volume brings together for the first time authors from diverse experiences and analytical traditions encouraging a conversation between science and technology and development studies around issues of science citizenship and globalisation It reflects on the nature of expertise the framing of knowledge processes of public engagement and issues of rights justice and democracy A wide variety of pressing issues is explored such as medical genetics agricultural biotechnology occupational health and HIV AIDS Drawing upon rich case studies from Asia Africa Latin America and Europe Science and Citizens asks Do new perspectives on science expertise and citizenship emerge from comparing cases across different issues and settings What difference does globalisation make What does this tell us about approaches to risk regulation and public participation How might the notion of cognitive justice help to further debate and practice

The Urban Planner's Methodology Examined Dale E. Casper, 1984 Subject Catalog Library of Congress, 1982 Between Rationality and Cognition Miriam Campanella, 1988

**Critical Pluralism, Democratic Performance, and Community Power** Paul Schumaker, 1991 Who governs is a central question in political science Typically political scientists address this question by relying upon either empirical analysis which explains existing political practices or normative analysis which describes ideal political practices

**Benefit, Cost, and Beyond** James T. Campen, 1986 *Managing Ambiguity and Change* Louis R. Pondy, Richard J. Boland, Howard Thomas, 1988-11-28 Academics from a number of disciplines and several practicing executives discuss how managers can make effective strategic decisions amidst the uncertainties and ambiguity of major transitions be they technological financial regulatory or economic Contributors draw lessons from the experiences of actual companies and they offer maps and models for guiding effective action Empirical studies reveal some proven practices for innovation in the face of adversity and a study in contrasts shows how one company successfully reframed policy in response to a drastic environmental change and how another succeeded by holding to a constant strategic plan in a changing environment
