France,1995-01-01 This book examines the cultural politics of knowledge in composition classrooms and presents classroom strategies that develop students awareness of their own ideological subjectivities **WPA, Writing Program Administration** ,1993 *Books in Print* ,1994

Composition and Literature Jesse Jones,Veva Vonler,Janet Harris,1987 This book focuses on composition the art and craft of writing It presents works of literature in various forms as examples and products of that writing And through the writing and reading opportunities provided it encourages the exploration of human experience In other words this textbook emphasizes the interrelatedness of writing literature and life The book is arranged according to the stages of life childhood adolescence adulthood old age and death Chap 1 **Involved** Charles Bazerman,1997 A brief flexible and innovative alternative to the standard rhetorics Involved offers a fresh approach to the traditional activities of undergraduate writing and teaches students that a successful education depends on the student s active involvement in reading and writing carefully seeking meaning in assigned work and sharing ideas with teachers and others The One vs. the Many Alex Woloch,2009-02-09 Does a novel focus on one life or many Alex Woloch uses this simple question to develop a powerful new theory of the realist novel based on how narratives distribute limited attention among a crowded field of characters His argument has important implications for both literary studies and narrative theory Characterization has long been a troubled and neglected problem within literary theory Through close readings of such novels as *Pride and Prejudice* *Great Expectations* and *Le P re Goriot* Woloch demonstrates that the representation of any character takes place within a shifting field of narrative attention and obscurity Each individual whether the central figure or a radically subordinated one emerges as a character only through his or her distinct and contingent space within the narrative as a whole The character space as Woloch defines it marks the dramatic interaction between an implied person and his or her delimited position within a narrative structure The organization of and clashes between many character spaces within a single narrative totality is

essential to the novel's very achievement and concerns striking at issues central to narrative poetics the aesthetics of realism and the dynamics of literary representation Woloch's discussion of character space allows for a different history of the novel and a new definition of characterization itself By making the implied person indispensable to our understanding of literary form this book offers a forward looking avenue for contemporary narrative theory **The British National Bibliography**

Popular Appeal Lesley Hawkes,Vivienne Muller,Sharyn Pearce,2013-11-18 Now is an opportune moment to consider the shifts in youth and popular culture that are signalled by texts that are being read and viewed by young people In a world seemingly compromised by climate change political and religious upheavals and economic irresponsibility and at a time of fundamental social change young people are devouring fictional texts that focus on the edges of identity the points of

transition and rupture and the assumption of new and hybrid identities This book draws on a range of international texts to address these issues and to examine the ways in which key popular genres in the contemporary market for young people are being re defined and re positioned in the light of urgent questions about the environment identity one s place in the world and the fragile nature of the world itself The key questions are What are the shifts and changes in youth culture that are identified by the market and by what young people read and view How do these texts negotiate the addressing of significant questions relating to the world today Why are these texts so popular with young people What are the most popular genres in contemporary best sellers and films Do these texts have a global appeal and if so why These over arching themes and ideas are presented as a collection of inter related essays exploring a rich variety of forms and styles from graphic novels to urban realism from fantasy to dystopian writing from epic narratives to television musicals The subjects and themes discussed here reveal the quite remarkable diversity of issues that arise in youth fiction and the variety of fictional forms in which they are explored Once seen as not as important as adult fiction this book clearly demonstrates that youth fiction and the popular appeal of this fiction is complex durable and far reaching in its scope
