Critical Realism And Composition Theory:

Critical Realism and Composition Theory Donald Judd, 2005-07-05 This volume examines expressivist cognitivist and social constructivist theories within composition theory and critiques the epistemological focus of modern composition theory and its neglect of the ontological foundations In Defence of Objectivity Andrew Collier, 2004-03 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company *Ontology of Sex* Carrie Hull, 2006-01-16 Poststructuralism particularly through the writings of Michel Foucault and Judith Butler has achieved remarkable success in challenging our belief in natural sex categories and instincts Here Carrie Hull endorses the progressive ideals of poststructuralism while demonstrating the superiority of a realist account of sex and sexuality Embracing biological and cultural variability Hull nonetheless shows that the sexed body is naturally structured and deeply meaningful Poststructuralist philosophers have argued that biological sex is a continuum rather than a binary and that sex identity and drive are entirely performances of cultural norms rather than expressions of innate qualities Hull draws parallels with Nelson Goodman W V O Quine and B F Skinner to show that these poststructuralist theories are rooted in a nominalist relativist and behaviourist philosophy and develops an alternative framework using arguments from contemporary and critical realism Employing colourful illustrations from biology anthropology and psychology Hull demonstrates the rich potential of realist philosophy and concludes that it is philosophically and scientifically correct on one hand and politically advisable on the other to maintain a distinction albeit attenuated between sex and gender and sexuality and behaviour Defending Objectivity Margaret Archer, William Outhwaite, 2004-07-31 Andrew Collier is the boldest defender of objectivity in science knowledge thought action politics morality and religion The diverse contributions range from social and political thought to philosophy **Explaining Global Poverty** Branwen Gruffydd Jones, 2007-01-24 Gruffydd Jones approach brings a book of real relevance for inequality in the modern world and gives an important platform from which to move forwards in the fight against poverty

(Mis)recognition, Social Inequality and Social Justice Terry Lovell, 2007-09-12 This collection of essays considers some of the conceptual and philosophical contentions that Nancy Fraser s work has provoked presenting some compelling examples of its analytical power in a range of contexts **Modelling Written Communication** Deirdre Pratt, 2011-01-19 This book offers an alternative view to current postmodern approaches to composition It takes a critical realist stance to arrive at the essence of written communication with the aim of informing a practical application a computerised writing tutor Following Robert Franck s seminal work on modelling a theoretical model of writing was first formulated consisting of an architecture of functions which constitute the prerequisites for effective communication Next an applied model a composing algorithm with an input option was developed showing composing to be a systemic social process with intra and extra systemic variation The algorithm provided the design template for a writing tutor program which models for the learner both the systemic and the socially situated nature of writing This book establishes composing as a communicative interaction and

shows the essential dynamism of writing while offering an exemplar of a systems approach to modelling in the social sciences

Engendering the State Lynn Savery, 2012-11-12 Why have states in general been slower to incorporate the international diffusion of women's human rights norms domestically than other human rights norms and why has the diffusion of these norms varied so greatly between states Why are some states more responsive and exert more effort than others to comply with these norms Engendering the State explains these key issues and argues that the gender biased identity of many states represents the most significant barrier to diffusion It also explores how particular norms have diffused into certain states at specific points in time as a consequence of international and domestic pressure The author addresses the limitations of existing explanations of international norms case studies of Germany Spain Japan and India which provide a new perspective on comparative analysis of Europe and Asia alternative arguments on cross national variation and the influence of international norms of sexual discrimination the theoretical and practical implications of the argument This book is essential to those with an interest in the topical subject of women's human rights gender studies and international studies
