    Security Issues for Wireless Sensor Networks Parag Verma,Ankur Dumka,Anuj Bhardwaj,Navneet Kaur,Alaknanda Ashok,Anil Kumar Bisht,Raksh Pal Singh Gangwar,2022-04-19 Wireless sensor networks WSNs have attracted high interest over the last few decades in the wireless and mobile computing research community Applications of WSNs are numerous and growing including indoor deployment scenarios in the home and office to outdoor deployment in an adversary s territory in a tactical background However due to their distributed nature and deployment in remote areas these networks are vulnerable to numerous security threats that can adversely affect their performance This problem is more critical if the network is deployed for some mission critical applications such as in a tactical battlefield Random failure of nodes is also very likely in real life deployment scenarios Due to resource constraints in the sensor nodes a traditional security mechanism with high overhead of computation and communication is not feasible in WSNs Design and implementation of secure WSNs is therefore a particularly challenging task This book covers a comprehensive discussion on state of the art security technologies for WSNs It identifies various possible attacks at different layers of the communication protocol stack in a typical WSN and presents their possible countermeasures A brief discussion on the future direction of research in WSN security is also included   Critical Issues in Information Processing Management and Technology Chantico Press Staff,1989
