**Critical Technology** Graeme Kirkpatrick, 2017-11-28 Have we resigned ourselves to a cyber future that has been decided behind our backs Why is technology and our understanding of it central to the concerns of critical social theory In developing the PC technologists have borrowed ideas from the human sciences about what people are like about the nature of meaning and the desirability of some experiences over others Yet to date the academic disciplines most concerned with these ideas have offered neither resistance nor debate In this book Graeme Kirkpatrick shows why it is crucial that we initiate that debate Offering a revealing critique of PC design and the social assumptions that underlie it Kirkpatrick argues that it relies on a particular conception of a capitalistic society that expects its technology to come pre packaged mass marketed and user friendly Anyone who is critical of such a society and its commodification of human achievement should he suggests be suspicious Kirkpatrick argues that the computer is a contested space within which major social conflicts are played out On the one hand there is a narrative of flexibility and human empowerment and on the other a sense of a system that controls our lives leaving us in thrall to the computer corporations and at constant risk from phishers and hackers The outcomes of these conflicts are extremely important as they will shape our future experience of technology society and politics **Critical Technology** is a lively provocative and often radical book which forces us to reflect on the meaning of an artefact that is central to our daily lives yet that we too often take for granted

**Book Review: Critical Technology: A Social Theory of Personal Computing** Neil Selwyn, 2006      **Technology, Research and Professional Learning** Jingjing Zhang, 2018-06-20 This book investigates the use of network technologies in research and explores how such use potentially changes the nature of professional learning between academics It attempts to situate the discussion of technology use in real world research settings to identify the different forms of participation in intellectual exchange embedded in academic dialogue and to further contribute to knowledge on how the use of network technology potentially changes the nature of learning Multiple data collection methods are employed in two forms of study a single case study and a number of individual interviews The single case study was carried out over a one year period and consisted of interviews 22 interviewees observations and document review Individual semi structured interviews were carried out over a similar period of time with a wider and different population of 24 academics from different Oxford faculties Half of these were interviewed twice The main findings presented in this book demonstrate that the direct consequences of technology use are changes to academic dialogue and scholarly communication in general The change to this critical aspect of research scholarly communication has potentially led to more distributed research in interconnected research environments It is the changes to scholarly communication and the research environment that consequently affect participation in intellectual exchange

**Information Technology in Librarianship** Gloria J. Leckie, John E. Buschman, 2008-11-30 In the last 15 years the ground both in terms of technological advance and in the sophistication of analyses of technology has shifted At the same

time librarianship as a field has adopted a more skeptical perspective libraries are feeling market pressure to adopt and use new innovations and their librarians boast a greater awareness of the socio cultural economic and ethical considerations of information and communications technologies Within such a context a fresh and critical analysis of the foundations and applications of technology in librarianship is long overdue *Technology and Social Power* Graeme Kirkpatrick,2008-02 Technology is an increasingly important dimension of social life This title discusses the impact of technology and science on our lives exploring how power is demonstrated and reinforced by technological innovation Technology and Democracy: Toward A Critical Theory of Digital Technologies, Technopolitics, and Technocapitalism Douglas Kellner,2021-10-06 As we enter a new millennium it is clear that we are in the midst of one of the most dramatic technological revolutions in history that is changing everything from the ways that we work communicate participate in politics and spend our leisure time The technological revolution centers on computer information communication and multimedia technologies is often interpreted as the beginnings of a knowledge or information society and therefore ascribes technologies a central role in every aspect of life This Great Transformation poses tremendous challenges to critical social theorists citizens and educators to rethink their basic tenets to deploy the media in creative and productive ways and to restructure the workplace social institutions and schooling to respond constructively and progressively to the technological and social changes that we are now experiencing
