Samuel Shermis, 1992 Based upon the idea that the only hope for substantial curricular reform and for adoption of reflective inquiry in American schools is for teachers to redefine the basic pedagogical concepts that they have inherited this book discusses how to teach students to reflect upon what they learn in school The three major sections of the book discuss 1 reasons why educators still do not teach reflective inquiry 2 a theory of reflective inquiry and 3 teachers and students identifying and internalizing problems Topics in the first section concern barriers to reflective inquiry philosophical assumptions that prevent reflective thought teaching as transmission philosophical absolutes a semantic analysis eclecticism and cultural forces Topics in the second section concern John Dewey's conception of reflective thinking what one must know before the process of inquiry begins thought and emotion knowledge as a function of a theory of reality the subjective objective dualism knowledge as pluralistic values as inseparable from knowledge transmission as the result of a philosophical position discussion as the heart of inquiry and what reflective discussion is Finally the third section discusses problem solving and reflective inquiry a model of reflective teaching in action and implications of applied critical inquiry for schools An appendix presenting a brief synopsis of Bloom's taxonomy and a 108 item bibliography are attached RS
