## **Croiset The Clairvoyant:**

**Croiset, the Clairvoyant** Jack Harrison Pollack, 1964 Translations of tape recordings and proceedings from the files of the Parapsychology Institute of the University of Utrecht and the Dutch Journal of Parapsychology and other sources attesting cases involving the extrasensory powers of the Dutch clairvoyant *Croiset, the Clairvoyant* Jack Harrison Pollack, 1969 **Croiset** Jack Harrison Pollack, 1965 Legitimacy of Unbelief Gerd H. Hövelmann, Hans Michels, 2017 Dutch journalist Piet Hein Hoebens 1948 1984 held a unique position in the controversies between proponents and skeptics of parapsychology and related fields While he described himself as a card carrying skeptic with strong ecumenical leanings even many of his nominal opponents appreciated his work and his penetrating open minded criticism Hoebens constructive influence on the culture of responsible scientific exchange is felt to this day The editors have collected and mostly translated more than 40 of Hoebens most significant writings about half of which were never published in English before The editors also added editorial introductions to all chapters to elucidate their original contexts and their lasting relevance Therefore the book is more than a commemoration of an important author it provides valuable insights into the history of parapsychology and its skeptical reflections Back cover Mediality on Trial Ehler Voss, 2020-09-21 This volume addresses controversies connected to the testing of the capacities and potentials of mediums Today we commonly associate the term medium with the technical communication between transmitters and receivers Yet this term likewise applies to those who cooperate with agencies that exceed the presumed domain of the material world Insofar as one presumes a division between distinctly opposed categories of religion and the secular technical media tend to be associated with the secular and human trance mediums tend to be associated with religion after 1900 This volume concerns the ways in which the term medium still marks an overlapping of and thus problematizes the aforementioned division between religion and the secular the personal and the technological The term medium carries with it a seed of doubt that is itself inseparable from investment in the medium's power insofar as they communicate with an other realm mediums offer the hope and promise of new possibilities and improved efficiency and thus of a better life yet they have simultaneously been under suspicion of altering or even inventing the messages they communicate It is due to this combination of promise and suspicion that mediumism has tended to evoke scientific religious and moral controversies Thus we can speak of a mediumistic trial that is a process in which a medium is put to the test concerning its potentials and trustworthiness Around 1800 experts were asked if a modern secular institution would be capable of inspiring domesticating or excluding trance mediumship This question has stayed with us ever since and the answers have remained inconclusive That is why the past and present of mediumship may be asked to elucidate each other *Science Confronts the Paranormal* Kendrick Frazier, 2023-10-17 A Gallop poll surveyed 506 American teenagers aged 13 to 18 and discovered the following 69% believe in angels 59% believe in ESP 55% believe in astrology 28% believe in clairvoyance 24% believe in Bigfoot 22% believe in witchcraft 20% believe in ghosts 18% believe in the Loch Ness

MonsterCarl Sagan has said that the wonders of real science far surpass the supposed and imagined mysteries of fringe science Yet as statistics show the paranormal is still an endless source of fascination for people around the world This collection of critical essays and investigative reports examines virtually every area of fringe science and the paranormal from a refreshingly scientific and clear minded viewpoint The authors are noted scientists philosophers psychologists and writers All bring to the task a determination to sift sense from nonsense and fact from fiction in an area notorious for misinformation misperception self delusion and wishful thinking They do so in a way that highlights the differences between real science and pseudoscience They ve made special efforts first to find the actual facts behind numerous claims that have popular appeal and then to explain and communicate what scientific investigation and reasoning reveal about them Subjects treated to incisive and entertaining examination include astrology ESP psychic detectives psychic predictions parapsychology remote viewing UFOs creationism the Shroud of Turin coincidences cult archaeology palmistry and fringe medicine There are also explorations of the implications of paranormal beliefs for science education **Yeux du miracle** Jack Harrison Pollack,1965

*A Skeptic's Handbook of Parapsychology* Paul Kurtz,1985 A comprehensive collection of the world s leading skeptics combining a detailed history of parapsychology and psychic research with a review of the current status of the field Highly recommended for both academic and general readers Choice Copyright Libri GmbH All rights reserved Harper's Encyclopedia of Mystical & Paranormal Experience Rosemary Guiley,1991 An alphabetical guide to the paranormal with more than five hundred entries on notable individuals supernatural phenomena such as apparitions and levitation geographical locations linked to the occult and spiritual traditions such as Sufism and Taoism Understanding the Psychic Powers of Man Jaime T. *Pseudoscience and the Paranormal* Terence Hines,1988 Examines the evidence behind many types of paranormal and pseudoscientific claims and explains through an analysis of the psychology of belief why people continue to believe in the reality of the supernatural **Your Psychic Powers and Immortality** John Alan Appleman,1968 There has been a great deal of controversy in connection with psychic powers but I also know John Appleman In my opinion he is probably one of the most clear thinking hard headed individuals I have ever encountered He would no more be connected with the irrational or the so called lunatic fringe than he would in his capacity as a lawyer be connected with anything shabby or shoddy John has

published over 50 books and over 100 articles He is a contributor to the Encyclopedia Britannica and World Book Encyclopedia and has held high office in various bar societies such as dean of International Society of Trial Lawyers and president of The Federation of Insurance Counsel among others This book has been many years in preparation and in writing Since Mr Appleman regards the writers of many psychical and metaphysical books as kooks much of this present work is debunking in nature in order to get to basic truths Here for the first time perhaps we find assembled a physiological view of living man explaining the manner in which the brain and neural pathways evolved their functions the relationship of the conscious and subconscious existence of the soul and proof of immortality As John has so often told me he realizes that any man who has the guts to discuss any psychic subject lays his reputation on the line However since as he says there is no subject of greater importance to mankind than life after death he is willing to accept the lifted eyebrows of the skeptics and as an intensive trial lawyer to be perhaps the most critical of all investigators The evidence contained in this book has been cross examined checked and repeatedly supported by witnesses of unquestioned integrity and since these incidents are presented through the eyes of a lawyer of John Alan Appleman s impeccable integrity they cannot be brushed lightly aside front and back flaps      **Dr. Sam** Jack Harrison Pollack,1975
