## **Crosscultural Perspectives On The Impossibility Of Global Bioethics:**

**Cross-Cultural Perspectives on the (Im)Possibility of Global Bioethics** J. Tao Lai Po-wah, 2013-11-21 The contributions to this volume grew out of papers presented at an international conference Individual Community Society Bioethics in the Third Millennium held in Hong Kong Special Administrative Region of the People's Republic of China between 25-28 May 1999. The conference was organized by the Centre for Comparative Public Management and Social Policy and Ethics in Contemporary China Research Group in the Faculty of Humanities and Social Sciences at the City University of Hong Kong. The conference brought together scholars from east and west to investigate the challenges to caring and to traditional moral authorities that would confront bioethics in the third millennium. They explored the implications of moral loss and moral diversity in post-traditional and post-modern societies and how these would shape the character of medical care and bioethics discourse in the new era. A proceedings volume under the same title of Individual Community Society Bioethics in the Third Millennium was published in May 1999 for the conference meeting. *Reframing Disease Contextually* Mary Ann Gardell Cutter, 2003-12-31 This volume will be of interest to philosophers of medicine, bioethicists and philosophers, medical professionals, historians of western medicine and health policymakers. The book provides an overview of key debates in the history of modern western medicine on the nature, knowledge and value of disease. It includes case studies of e.g. AIDS, genetic disease and gendered disease. Person, Society and Value Paulina Taboada, K.F. Cuddeback, P. Donohue-White, 2002-05-31 From a symposium marking the halfway point in their two-year research, scholars of philosophy and medicine from the US, Europe and Chile explore how the World Health Organization's definition of health can be both personalist and operational. The 11 papers cover health in relation to the human person, human well-being and society. The general conclusion is that answering philosophical questions regarding such matters as the essence and value of human health is crucial for solving political problems such as how to legislate health care policy. The International Academy of Philosophy undertook the project with funding from the Swiss National Science Foundation. Annotation copyrighted by Book News Inc. Portland, OR. Public Health Disasters: A Global Ethical Framework Michael Olusegun Afolabi, 2018-08-27 This book presents the first critical examination of the overlapping ethical, sociocultural and policy-related issues surrounding disasters, global bioethics and public health ethics. These issues are elucidated under the conceptual rubric Public health disasters PHDs. The book defines PHDs as public health issues with devastating social consequences, the attendant public health impacts of natural or man-made disasters and latent or low prevalence public health issues with the potential to rapidly acquire pandemic capacities. This notion is illustrated using Ebola and pandemic influenza outbreaks, atypical drug-resistant tuberculosis and the health emergencies of earthquakes as focal points. Drawing on an approach that reckons with microbial, existential and anthropological realities, the book develops a relational-based global ethical framework that can help address the local, anthropological, ecological and transnational dynamics of the ethical issues engendered by public

health disasters The book also charts some of the critical roles that relevant local and transnational stakeholders may play in translating the proposed global ethical framework from the sphere of concept to the arena of action This title is of immense benefit to bioethics scholars public and global health policy experts as well as graduate students working in the area of global health public health ethics and disaster bioethics *Index of Conference Proceedings* British Library.
