This book is a reference for librarians mathematicians and statisticians involved in college and research level mathematics and statistics in the 21st century We are in a time of transition in scholarly communications in mathematics practices which have changed little for a hundred years are giving way to new modes of accessing information Where journals books indexes and catalogs were once the physical representation of a good mathematics library shelves have given way to computers and users are often accessing information from remote places Part I is a historical survey of the past

15 years tracking this huge transition in scholarly communications in mathematics Part II of the book is the bibliography of resources recommended to support the disciplines of mathematics and statistics These are grouped by type of material Publication dates range from the 1800 s onwards Hundreds of electronic resources some online both dynamic and static some in fixed media are listed among the paper resources Amazingly a majority of listed electronic resources are free

Information Sources in Science and Technology C. C. Parker,R. V. Turley,2013-10-22 Information Sources in Science and Technology A Practical Guide to Traditional and Online Use presents a selection of traditional and online methods of using information sources in science and technology including people organizations literature hosts and databases This text serves as a reference book that helps the reader choose sources of information and their guides includes a routine for finding and using information and offers tips on searching and obtaining literature in a usable form This book is comprised of nine chapters and begins by explaining how to choose type s of information source that is likely to be most helpful The chapters that follow present guides on people organizations and literature as sources of information A chapter on information services focuses on those organizations that supply information or references to information that could be helpful These services range from answering telephone queries to supplying collections of relevant documents and from broadcast television information to direct connection with computer databases The next chapters discuss ways of searching the literature and computer databases obtaining literature in a usable form and organizing and presenting information This book concludes by considering current awareness or keeping up to date with information about recent developments This monograph is intended for librarians and information officers especially for those working in scientific or industrial environments practicing scientists and engineers and students associated with these professions
