

A detailed geological cross-section illustration showing various rock layers. At the top, a wellbore with a valve is shown penetrating a light-colored, sandy layer. Below this is a layer of rounded, light-colored pebbles or clasts in a finer matrix. The central part of the image features a large, wavy band of greenish-grey material with a prominent, irregular, blocky texture. Below this is a layer of reddish-brown material containing small, light-colored circular features. Further down is a dark, wavy layer with a mottled appearance. The bottom section consists of a light-colored, sandy layer with a small, dark, irregularly shaped object (possibly a fossil or rock fragment) visible. The overall style is that of a technical illustration or a stylized geological diagram.
