Dictionary Of Statistics:

A Dictionary of Statistics 3e Graham Upton, Ian Cook, 2014-03 This wide ranging dictionary covers over 2 300 statistical terms in accessible jargon free language All existing entries and web links have been revised and updated to ensure that the content is as relevant as possible An indispensable reference work for any students or professionals who come into contact with statistics at work or university

Dictionary of Statistics & Methodology W. Paul Vogt, R. Burke Johnson, 2011-03-08 In this newly updated Fourth Edition new terms are defined new synonyms are included and both are illustrated with new graphics Growth in the fields of statistics and methodology has mandated these inclusions The number of definitions and illustrations has grown from about 2 400 in the third edition to about 2 800 in this one an increase of around 16 percent While some entries have been shortened and obsolete ones have been deleted which helped make room for the new entries comparatively few terms from the earlier editions have been deleted The importance of classic terms persists even as new techniques and the terms describing them are invented Finally the suggestions for further reading have been updated and a new section on Useful Websites on Statistics and Methodology has been added

The Dictionary of Statistics Michael George Mulhall, 1903

A Topical Dictionary of Statistics Gary L. Tietjen, 2012-12-06 Statistics is the accepted body of methods for summarizing or describing data and drawing conclusions from the summary measures Everyone who has data to summarize thus needs some knowledge of statistics The first step in gaining that knowledge is to master the professional jargon This dictionary is geared to offer more than the usual string of isolated and independent definitions it provides also the context applications and related terminology The intended audience falls into five groups with rather different needs

- 1 professional statisticians who need to recall a definition
- 2 scientists in disciplines other than statistics who need to know the acceptable methods of summarizing data
- 3 students of statistics who need to broaden their knowledge of their subject matter and make constant reference to it
- 4 managers who will be reading statistical reports written by their employees and
- 5 journalists who need to interpret government or scientific reports and transmit the information to the public
