European Communities John Paxton, 1992-01-01 The establishment of the European Economic

Community in 1958 was one of the most remarkable developments in the history of the post World War II era. It aimed for nothing less than a complete economic union so that goods, people and capital would be able to pass over national boundaries of member countries as freely as they move within any one country. As the Community's target date of 1992 for economic integration draws closer, the need for information both current and historical becomes more urgent. The aim of this annotated bibliography is to create a critical and descriptive list of books published mainly in English for businessmen and analysts combining older publications with new. The literature on the EC is vast and issues. The Community itself nearly 3000 publications a year. The range of material covered in this volume is distinguished by its great scope. Historical sections provide listings on the postwar years of economic recovery, the development of the EC and biographies of the leading personalities involved. Policy oriented sections encompass such subjects as labor, transportation, environment, energy and education. The political ramifications of economic union, financial and fiscal affairs, relations between the EC and the Third World and foreign relations in general are dealt with in separate sections. The volume concludes with a listing of major European Community publications. The sheer bulk of published material on the EC, much of it duplication, has made keeping up with its developments difficult for small and medium in Europe and elsewhere. This invaluable sourcebook will provide the business community and the political establishments with better access to EC information as they grapple with the implications of 1992.

Statuses within EU Law Antonio Bartolini, Roberto Cippitani, Valentina Colcelli, 2019-01-05. This Dictionary analyses the ways in which the statuses of European citizens are profoundly affected by EU law. The study of one's particular status as a worker, consumer, family member, citizen etc helps to reconsider the legal notions concerning an individual's status at the EU level. The Dictionary includes a foreword by Evgeni Tanchev, Advocate General at the Court of Justice of the European Union, which illustrates some interesting features of the Court's case law on statuses. The Dictionary's core is composed of 79 chapters published in alphabetical order. Each brief chapter analyses how the individual status was conditioned or created by contemporary EU law or how the process of European integration modified the traditional juridical definition of the respective status. The Dictionary provides answers to the following questions: Has the process of European integration modified the traditional juridical definition of individual status? Has the concept of legal status now acquired a new function? What role has EU law played in developing a new modern function for the concept of individual status? Are the selection of a specific individual status by EU law and the proliferation of such statuses, which is synonymous with the creation of new privileges, collectively undermining the goal of achieving substantive equality between EU citizens? Does this constitute a return to the past? Under EU law is it possible to create a uniform definition of the legal status of the person over and above

the definition that is provided by a given Member State's legal system

Dictionary of Acronyms for European Community Action Plans and Programmes with Decoded Details Plus Indexes Commission of the European Communities, 1993 **Dictionary of European actors** Elisabeth Lambert Abdelgawad, H       Michel, 2015-04-07 If the European political space has been extensively explored research has remained all too often focused on the institutions of the European Union and the Council of Europe rather than on the actors who make Europe This dictionary brings a new angle to scholarship on Europe by systematically investigating its actors those who work within the institutions or in close contact with them those who are the targets of European policies those in the name of whom reforms are carried out those who promote Europe and those who oppose it It showcases a comprehensive interdisciplinary approach that bridges the usual separation between the European Union and the Council of Europe In each entry contributors selected among the leading specialists in their fields of research present the state of the art and the most current research perspectives on European actors Students teachers and researchers with an interest in Europe will find this volume to be a valuable work of reference and a source of new and stimulating ideas and perspectives on Europe More broadly the dictionary will appeal to professionals of Europe eager to gain insights into their working environment as well as to readers interested in understanding Europe through its actors
