The Oxford Handbook of the Egyptian Book of the Dead Rita Lucarelli, Martin Andreas Stadler, 2023 With a generous thorough selection editors Rita Lucarelli and Martin Andreas Stadler offer in The Oxford Handbook of the Egyptian Book of the Dead a wide ranging synthesis of essential scholarship on Egyptian religious and mystical practices centered on the central text of that tradition

Writings of Early Scholars in the Ancient Near East, Egypt, Rome, and Greece Annette Imhausen, Tanja Pommerening, 2010 Medicine astronomy dealing with numbers even the cultures of the pre modern world offer a rich spectrum of scientific texts But how are they best translated Is it sufficient to translate the sources into modern scientific language and thereby above all to identify their deficits Or would it be better to adopt the perspective of the sources themselves strange as they are only for them not to be properly understood by modern readers Renowned representatives of various disciplines and traditions present a controversial and constructive discussion of these problems

The Art and Architecture of Ancient Egypt William Stevenson Smith, William Kelly Simpson, 1998-01-01 A survey of Egyptian art and architecture is enhanced by revised text an updated bibliography and over four hundred illustrations

The Coffin of Heqata Harco Willems, 1996 The coffin published in this book represents a type that had some popularity in southern Upper Egypt in the early Middle Kingdom but which despite its extraordinary decoration had not attracted attention so far The most striking feature of the decoration is that the object friezes the pictorial rendering of ritual implements usually found on coffin interiors of the period also include complete ritual scenes some of which are attested only here Apart from this the decoration includes an extensive selection of the religious texts know as the Coffin Texts The author first studies the archaeological context and dating of the coffin and attempts a reconstruction of the construction procedures from his technical description of the monument The detailed account of the decoration in the rest of the book interprets the ritual iconography and offers fresh translations and interpretations of the Coffin Texts A methodological innovation is that he regards the scenes and texts not as individual decoration elements but as components of an integral composition The background of this composition is argued to be a view of life in the hereafter in which the deceased is involved in an unending cycle of ritual action which reflects the funerary rituals that were actually performed on earth On the one hand these netherworldly rituals aim at bringing the deceased to new life by mummification on the other the newly regenerated deceased partakes in embalming rituals for gods representing his dead father Osiris or Atum These gods in their turn effectuate the deceased s regeneration The entire process results in a cycle of resuscitation in which the afterlife of the deceased and of the father gods are interdependent The sociological bias of this interpretation with its emphasis on kinship relations differs significantly from earlier attempts to explain Egyptian funerary religion
