Die Architektur Der Synagoge The Architecture Of The Synagogue:

The Destroyed Synagogues of Vienna Bob Martens, Herbert Peter (Dipl.-Ing.), 2011 This book is devoted to the former Viennese synagogues that were destroyed and thus disappeared irretrievably from the face of the city With the help of computer aided design and rapid prototyping a working group was able to virtually rebuild the destroyed synagogues Historical photographs and plans from the time these synagogues were built are contrasted with the virtual reconstructions Together with the accompanying texts the book provides a complete image of the individual houses of prayer Of particular interest are the re creations of the urban fabric that place the destroyed synagogues in the context of the present day city Series Stadtbildverluste Vol 4 **Sacred Buildings** Rudolf Stegers, 2008-05-16 The building of religious structures represents a rare opportunity for the architect to concentrate on the creation of volume space and form Sacred architecture is far less determined than other building tasks by functional requirements norms and standards As a rule it is free to unfold as pure architecture Thus in design terms this building task offers enormous freedoms to the architect At the same time however the special atmospherics of sacred spaces call on the part of the architect for a highly sensitive treatment of religion and the relevant cultural and architectural traditions In a systematic section this volume introduces the design technical and planning fundamentals of building churches synagogues and mosques In its project section it also presents about seventy realized structures from the last three decades Drawing upon his in depth knowledge of the subject and his many years of publishing experience the author offers a valuable analysis of the conceptual and formal aspects that combine to create the religious impact of spaces e g the ground plan the shapes of the spaces the incidence of light and materiality *The Torah Ark in Renaissance Poland* Ilia M. Rodov, 2013-02-01 The book explores the patronage formation and symbolism of the Renaissance Torah ark in Polish synagogues **Building a Public Judaism** Saskia Coenen Snyder, 2013-01-08 Coenen Snyder considers what the architecture and construction of nineteenth century European synagogues reveal about the social progress of modern European Jews The process of claiming a Jewish space was a marker of acculturation but not full acceptance she argues The new edifices even if spectacular revealed the limits of Jewish integration **German Jewry and the Allure of the Sephardic** John M. Efron, 2019-05-28 In the eighteenth and nineteenth centuries as German Jews struggled for legal emancipation and social acceptance they also embarked on a program of cultural renewal two key dimensions of which were distancing themselves from their fellow Ashkenazim in Poland and giving a special place to the Sephardim of medieval Spain Where they saw Ashkenazic Jewry as insular and backward a result of Christian persecution they depicted the Sephardim as worldly morally and intellectually superior and beautiful products of the tolerant Muslim environment in which they lived In this elegantly written book John Efron looks in depth at the special allure Sephardic aesthetics held for German Jewry Efron examines how German Jews idealized the sound of Sephardic Hebrew and the Sephardim s physical and moral beauty and shows how the allure of the Sephardic found expression in neo Moorish

synagogue architecture historical novels and romanticized depictions of Sephardic history He argues that the shapers of German Jewish culture imagined medieval Iberian Jewry as an exemplary Jewish community bound by tradition yet fully at home in the dominant culture of Muslim Spain Efron argues that the myth of Sephardic superiority was actually an expression of withering self critique by German Jews who by seeking to transform Ashkenazic culture and win the acceptance of German society hoped to enter their own golden age Stimulating and provocative this book demonstrates how the goal of this aesthetic self refashioning was not assimilation but rather the creation of a new form of German Jewish identity inspired by Sephardic beauty *Synagogues in Germany* Technische Universität Darmstadt, Kunst- und Ausstellungshalle der Bundesrepublik Deutschland, 2004 These elaborate CAD reconstructions developed by Darmstadt Technical University provide a representative survey of the architecture of synagogues in Germany before their destruction What is more they convey visual impressions of the diversity the splendour and the significance of the synagogue in the history of German urban architecture from the early nineteenth century until 1938 In doing so they also demonstrate the potential of such media to contribute to a new culture of remembrance Reactions to the first exhibition in 2000 in Bonn Germany were resounding with international praise for the quality of the simulations and their value as an instrument in the service of historical truth This publication presents the results for the first time in print to coincide with the launching of an exhibition in Tel Aviv which will travel to New York Los Angeles and further international venues **The History of the Shield of David** Gerbern S.
