Biomimetics for Architecture Jan Knippers, Ulrich Schmid, Thomas Speck, 2019-06-17 Nature has always been a source of inspiration for the design of the human environment The analysis of biological constructions can not only lead to astonishing technical solutions but can also inspire the design of architecture Bionics is a fascinating border area between pure research and practical application biologists chemists physicists mineralogists and paleontologists meet up with material scientists engineers and architects and transfer their knowledge to architecture and construction Using numerous practical examples this richly illustrated introduction traces the process from the understanding of how something functions to abstraction for example in computer models and the construction of initial prototypes through to fully functional manufacture and production

Einführung in die Architektur-Ästhetik Herman Sörgel, 1918

The Historiography of Modern Architecture Panayotis Tournikiotis, 2001-02-27 The history of modern architecture as constructed by historians and key texts Writing according to Panayotis Tournikiotis has always exerted a powerful influence on architecture Indeed the study of modern architecture cannot be separated from a fascination with the texts that have tried to explain the idea of a new architecture in a new society During the last forty years the question of the relationship of architecture to its history of buildings to books has been one of the most important themes in debates about the course of modern architecture Tournikiotis argues that the history of modern architecture tends to be written from the present projecting back onto the past our current concerns so that the beginning of the story really functions as a representation of its end In this book the buildings are the quotations while the texts are the structure Tournikiotis focuses on a group of books by major historians of the twentieth century Nikolaus Pevsner Emil Kaufmann Sigfried Giedion Bruno Zevi Leonardo Benevolo Henry Russell Hitchcock Reyner Banham Peter Collins and Manfredo Tafuri In examining these writers thoughts he draws on concepts from critical theory relating architecture to broader historical models
