Sport, Memory and Nationhood in Japan Andreas Niehaus, Christian Tagsold, 2013-09-13 This book clarifies and verifies the role sport has as an alternative marker in understanding and mapping memory in Japan by applying the concept of lieux de mémoire realms of memory to sport in Japan Japanese history and national construction have not been short of sports landmarks since the end of the nineteenth century Western style sports were introduced into Japan in order to modernize the country and develop a culture of consciousness about bodies resembling that of the Western world Japan's modernization has been a process of embracing Western thought

and culture while at the same time attempting to establish what distinguishes Japan from the West In this context sports functioned as sites of contested identities and memories The Olympics baseball and soccer have produced memories in Japan but so too have martial arts which by their very name signify an attempt to create traditions beyond Western sports Because modern sports form bodies of modern citizens and at the same time offer countless opportunities for competition with other nations they provide an excellent ground for testing and contesting national identifications By revealing some of the key realms of memory in the Japanese field of sports this book shows how memories and counter memories of sport moments places and heroes constitute an inventory for identity This book was originally published as a special issue of Sport in Society
