Flexible Lives Stefanie Reissner, Michal Izak, 2025-08-07 This geographically and methodologically diverse volume shines the spotlight on a variety of flexible working practices beyond the predominantly Western perspective and zooms in on the gendered aspects of flexible working The increasing use of flexible work arrangements has decoupled work from time and space making the world of work and home increasingly fluid and challenging to manage The Covid 19 pandemic in particular has been a catalyst for questioning accepted norms of where when and how work takes place This book seeks to explore the impact which this reshaping of traditional modes of working has had on workplace interactions and relationships as well as on managing the boundaries between familial and working lives In this way this collection contributes to a wider dialogue concerning the flexibility challenges encountered by white collar workers which is needed now more than ever This book will be relevant to scholars practitioners and policymakers in the fields of gender studies organizational behavior human resources and labor economics It will be particularly useful for those examining the impact of remote work the future of work organizational culture and the social and economic implications of shifting work practices The chapters in this book were originally published in *Culture and Organization* and are accompanied by an updated Introduction and a new Epilogue

Human Diversity in Education Kenneth Cushner, Averil McClelland, Hyla Cushner, Philip L. Safford, 2021-03 It is difficult to fathom the myriad changes that have occurred and that influence the content of this book in just three years since the previous edition As this book goes to press we have witnessed many nations in Europe as well as the United States that have made dramatic political shifts from open and liberal leanings to more populist nationalistic and conservative ideologies These shifts have been accompanied by an increase in xenophobia and stricter actions to reduce immigration often accompanied by a rise in anti immigrant anti Semitic and Islamophobic sentiment The conflicts and struggles in Afghanistan Iraq and Syria continue as tensions between the United States and Russia fester A questioning of Truth with an onslaught of fake news has emerged having a major influence on the 2016 U S presidential election And we expect numerous changes to occur under the new U S Secretary of Education Betsy DeVos And these challenges are in the political arena alone Across the planet people continue to feel the stresses of the seemingly endless changes and challenges they confront on many fronts Climate change continues to advance resulting in new and unpredictable weather patterns despite a vocal minority that appears to deny its existence Although making gains people continue to wrestle with questions surrounding same sex marriage and gay rights the question of health care the accelerated identification of children with autism and other disabilities as well as our aging population span cultural differences and cut across geographic political and social boundaries continuing to impact us all at the local national and global levels Some people are eager to embrace innovation and change while others struggle through a variety of political and social means to retain older and more traditional ways of doing things Such challenges continue to enter and impact our increasingly culturally diverse classrooms and communities

To effectively address and solve the multitude of issues we face it is incumbent upon teachers to provide young people with a foundation that will assist them to better understand the complex nature of the world in which they will live while developing the skills that will enable them to be proactive problem solvers in an interdependent global society This requires people who have the knowledge skills and motivations to reach beyond their own cultural boundaries and a willingness and ability to collaborate with others If people are not willing and able to do so these and other future problems simply will not be solved Developing intercultural understanding and competence must be actively addressed throughout the school curriculum This tenth edition of *Human Diversity in Education An Intercultural Approach* continues to focus on the preparation of teachers and other human service providers who can interact effectively with the wide diversity of people they are certain to encounter and who are able to transmit this knowledge and skill to the individuals in their charge
