The Balancing Act of Working Mothers

and *Caring Fathers* Meret Lütolf, 2025-04-15 This Open Access book explores how egalitarian parental leave policies can support a more balanced division of paid work and caregiving. Introducing a novel analysis grid and a unique dataset, Meret Lütolf examines parental leave policies in five countries: United States, Switzerland, Germany, Finland, and Sweden, revealing how fully paid non-transferable leave can promote gender-neutral caregiving roles. Key findings highlight the connection between longer paternal leave and a more equal distribution of unpaid work, along with fathers' willingness to reduce paid work hours in favor of caregiving. By combining multiple research methods, the study links policy intentions with real-life outcomes and identifies feasible reforms, including full wage replacement that can enhance egalitarianism without raising policy costs. Offering valuable insights for policymakers, researchers, and advocates, this book demonstrates how parental leave policies can contribute to more equal family dynamics and address broader gender inequalities in society.
