AI Fairness Derek Leben, 2025-05-13 A theory of justice for AI models making decisions about employment lending education criminal justice and other important social goods Decisions about important social goods like education employment housing loans health care and criminal justice are all becoming increasingly automated with the help of AI But because AI models are trained on data with historical inequalities they often produce unequal outcomes for members of disadvantaged groups In AI Fairness Derek Leben draws on traditional philosophical theories of fairness to develop a framework for evaluating AI models which can be called a theory of algorithmic justice a theory inspired by the theory of justice developed by the American philosopher John Rawls For several years now researchers who design AI models have investigated the causes of inequalities in AI decisions and proposed techniques for mitigating them It turns out that in most realistic conditions it is impossible to comply with all metrics simultaneously Because of this companies using AI systems will have to choose which metric they think is the correct measure of fairness and regulators will need to determine how to apply currently existing laws to AI systems Leben provides a detailed set of practical recommendations for companies looking to evaluate their AI systems and regulators thinking about laws around AI systems and he offers an honest analysis of the costs of implementing fairness in AI systems as well as when these costs may or may not be acceptable Minor Keys Samantha Parsley, 2025-10-09 What s it like to work in the male dominated world of electronic music How do women and gender expansive music producers and DJs thrive despite clubland s so called bro culture This book combines the author s personal journey into DJing and music production with insights from a six year immersive research project and interviews with 63 global artists to explore the challenges women and gender expansive artists face in the industry The book tackles common myths around gender technology and cultural production head on introducing the concept of ameliorative work to recognise the continual and considerable additional work that minoritized genders do in order to succeed Engaging accessible and thought provoking this book is a must read for anyone interested in electronic music the sociology of the contemporary club scene or diversity issues for workers in the creative industries The Routledge Companion to Global Photographies Lucy Soutter, Duncan Wooldridge, 2024-08-30 In response to widespread demand for more knowledge and insight about contemporary photographies beyond Western centers of production and dissemination this volume provides a transnational discussion grounded in dialogue between authors and editors from diverse locations and contexts Ecological and decolonial discourses around photography reveal the medium s global entanglements images produced on one side of the globe are the result of labors which span its full surface At the same time the multiplicity of approaches and understandings of the photograph reveal that even though it might seem like a universal language we utilize its tools to radically different ends The volume explores issues surrounding cultural translation photography s response to climate change decolonial practices network formation new materialities identities and the role of photobooks It also provides in depth surveys and case studies

of global practices and theories alongside interviews and roundtable discussions with key figures whose perspectives illuminate the contemporary field This groundbreaking collection is an essential resource for academics and students working in or with photography contextual studies history and theory but also media and cultural studies more broadly The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
