Teaching Media Literacy with Social Media News Roy S. Whitehurst, 2024-08-30 Featuring tools activities and insightful stories from a CIA analyst and instructor with 30 years of experience this practical and engaging book supports busy educators to teach the lifelong skills of news and media literacy to their students Based on existing curriculum and teaching standards this guidebook shows how social studies and English language arts ELA teachers can build students confidence with social media evaluation skills which are critical to engaging in civic discourse and building a stronger democracy In Part 1 Whitehurst gives an overview of the media evaluation techniques based on those you would learn as a CIA analyst including understanding how our biases and mindset make us vulnerable to disinformation learning how media tries to persuade us checking facts and spotting disinformation Part 2 dives deeper by showing teachers how learners can check if an argument on social media is valid and how fallacies and manipulation tactics in online arguments can complicate this important skill It is illustrated by examples from social media and contemporary popular culture in different mediums including videos photos memes and AI generated content You can also find fresh and updated social media examples on the author s website News Literacy Sleuth Packed with practical classroom resources examples from popular culture and engaging insights into the CIA analyst role this book is designed to support middle and high school teachers with news and media literacy in social studies civic education and ELA

The Radical Case for Teaching Skim Reading in First-Year Writing Ellen C. Carillo, 2025-10-15 The Radical Case for Teaching Skim Reading in First Year Writing encourages faculty particularly in writing studies to check internal biases toward deep reading and teach skim reading in first year writing courses Written by Ellen C Carillo who has previously published on the importance of teaching deep reading this small book is a controversial prompt for further discussion and exploration Data from studies of the lived experiences of undergraduates indicate that students do not need deep reading practices in the majority of their classes across the disciplines and moreover that students succeed in their classes by skim reading Rather than imagining an idealized set of circumstances that allow for sustained deep reading as does a great deal of the scholarship on reading in writing studies The Radical Case for Teaching Skim Reading in First Year Writing argues for teaching students reading practices that will support their success in their college writing assignments rather than those strategies the field believes should support their success In our information landscape and our fragile democracy encouraging skimming as opposed to deep reading may seem like a gamble this very tendency toward the quick rather than

the critical has undoubtedly contributed to the current crisis of mass misinformation However teaching students to use skim reading as a strategic tool for purposeful engagement and efficient yet thoughtful information filtering better equips them to navigate the rapidly changing information landscape and manage the fast paced flow of content from diverse media sources

How to Enhance Learning Efficiency When Online Learning is Popular and Indispensable: Theory, Research and Practice Rong Lian,Chang Liu ,Juzhe Xi,2024-07-17 Online learning has become more and more common globally whether for comfort adapting to work hours or just having the freedom to study from anywhere And now under the coronavirus pandemic as people are having to stay at home it has become more important than ever Although the popularity of wireless network and portable smart device makes it possible for people to acquire and learn knowledge anytime and anywhere it does not necessarily mean an increased learning performance Relevant research in cognitive science has revealed possible limitations in online learning For example the knowledge acquired through online learning tends to be fragmented and lacks guidance for integrated thinking among

different subjects which makes it difficult for learners to form a systematic knowledge structure. Learners may experience cognitive overload, metacognitive illusion, and low learning efficiency in self-regulated learning. It follows that in the post-COVID 19 era, online learning puts forward new requirements and challenges to contemporary students, not only to their learning strategies but also to positive character traits in learning. Most of the current learning theories were developed in the early 20th century and may not fit in well with the current situation, then possibly leading to inefficient learning and increased learning burden. Therefore, it is necessary and important to reexplore the influencing factors and mechanisms that affect the learning efficiency of students at all levels nowadays, based on which we could construct a theoretical model of efficient learning model.

A Writer's Reference with Exercises Diana Hacker, Nancy Sommers, 2024-09-26. A Writer's Reference with Exercises answers common writing questions, helps you accomplish college assignments with confidence, and gives you strategies for using AI tools responsibly to save time but still sound like you. *The Teachers Journal and Abstract*, 1929.

A Writer's Reference with Writing about Literature Diana Hacker, Nancy Sommers, 2024-10-01. Your college writing will be one way you put your ideas and your self out into the world. A Writer's Reference helps you strengthen your skills for that important work. It helps you develop a range of literacies: writing, reading, thinking, collaborating, using information, and working responsibly with AI. Acknowledging that generative AI tools are part of many writer's processes, A Writer's Reference teaches concrete, flexible strategies for applying your human intelligence to artificial intelligence. See C1.a and the AI tips throughout. It helps writers to see AI not as a substitute but a starting point, because if you've heard the expression "you do you," you know that AI simply can't do you. Not authentically. It seems magical, but in fact, it understands nothing, can't think, and won't ever replace the human voice your readers will want to hear.
