Fundamentals of Deep Learning and Computer Vision Nikhil Singh, Paras Ahuja, 2020-02-24 Master Computer Vision concepts using Deep Learning with easy to follow steps DESCRIPTION This book starts with setting up a Python virtual environment with the deep learning framework TensorFlow and then introduces the fundamental concepts of TensorFlow Before moving on to Computer Vision you will learn about neural networks and related aspects such as loss functions gradient descent optimization activation functions and how backpropagation works for training multi layer perceptrons To understand how the Convolutional Neural Network CNN is used for computer vision problems you need to learn about the basic convolution operation You will learn how CNN is different from a multi layer perceptron along with a thorough discussion on the different building blocks of the CNN architecture such as kernel size stride padding and pooling and finally learn how to build a small CNN model Next you will

learn about different popular CNN architectures such as AlexNet VGGNet Inception and ResNets along with different object detection algorithms such as RCNN SSD and YOLO The book concludes with a chapter on sequential models where you will learn about RNN GRU and LSTMs and their architectures and understand their applications in machine translation image video captioning and video classification

KEY FEATURES

- Setting up the Python and TensorFlow environment
- Learn core Tensorflow concepts with the latest TF version 2.0
- Learn Deep Learning for computer vision applications
- Understand different computer vision concepts and use cases
- Understand different state of the art CNN architectures
- Build deep neural networks with transfer Learning using features from pre trained CNN models
- Apply computer vision concepts with easy to follow code in Jupyter Notebook

WHAT WILL YOU LEARN

This book will help the readers to understand and apply the latest Deep Learning technologies to different interesting computer vision applications without any prior domain knowledge of image processing Thus helping the users to acquire new skills specific to Computer Vision and Deep Learning and build solutions to real life problems such as Image Classification and Object Detection This book will serve as a basic guide for all the beginners to master Deep Learning and Computer Vision with lucid and intuitive explanations using basic mathematical concepts It also explores these concepts with popular the deep learning framework TensorFlow

WHO THIS BOOK IS FOR

This book is for all the Data Science enthusiasts and practitioners who intend to learn and master Computer Vision concepts and their applications using Deep Learning This book assumes a basic Python understanding with hands on experience A basic senior secondary level understanding of Mathematics will help the reader to make the best out of this book
