Moral design and technology Bart Wernaart, 2023-08-14 When should a surveillance system that is used in preventive policing sacrifice the privacy of citizens to prevent criminality What should be the impact of individual moral expectations when a social media platform designs an algorithm To what degree can we use technology driven deception in dementia care practices And can we create a moral compass for a dashboard society Over the last decade the impact of technological innovation has been unprecedented It has profoundly changed the way we participate and interact in society It has also led to new moral challenges Not only because of the technology itself but also because this technology is used in the context of a globalised world with a more prominent role for the private sector This can result in moral confusion individuals who alternately assume the role of citizen and consumer feel unable to influence the design of technology that has a strong impact on their core values Sustaining this moral confusion is in nobody's long term interest In this book we propose to overcome this moral confusion by using a bottom up design approach that incubates ethics when constructing new technologies This book is composed of four parts In the first part we focus on how to integrate moral decisions and morality in the design process of new technology In the second part we assess how moral design relates to related discourse including business ethics law and policy In the third part of this book various case studies are highlighted that focus on particular moral design issues at the crossroads of technological innovation in the public and private sector In the last part we look ahead and discuss what the future might look like if we use moral design as a central approach in creating new technology This book is relevant for IT and engineering professionals business leaders and policymakers with innovation in their portfolios and students of applied science who are interested in the moral design of technology The chapters are written by experts and leading researchers in an attractive accessible and practical writing style Each chapter offers colourful examples and challenges the reader to critically think through moral decision making and the design of innovation See also the inaugural speech of Bart Wernaart on Moral Designs on YouTube

Prepare your business for tomorrow with a clear look at where AI is headed and how you can stay competitive in a rapidly changing marketplace.

Starting a Business With AI Tom Berty, 2025-10-26

Ever dreamed of starting your own business but felt blocked by a lack of time, money, or experience? What if you could launch a high-performing business all on your own, with a secret partner who never sleeps, never forgets, and works faster than you ever could? That's exactly what this book hands you: a complete step-by-step guide to starting a business with free AI doing the heavy lifting. In *Starting A Business With Free AI*, you'll discover how to turn your ideas, skills, and passions into a fully operational business without hiring a team, spending a fortune, or getting stuck in complicated tech. You AI becomes a one-person startup powerhouse capable of everything from brainstorming ideas to writing your website copy, crafting irresistible offers, running marketing campaigns, and even generating professional business plans. Every step comes with simple, actionable AI prompts so you can do it fast and confidently. You'll start by clarifying exactly what success means for you: income goals, lifestyle preferences, and work-life balance, and let AI help map the fastest path to get there. Next, you'll uncover business ideas that actually have demand, choose the business model that fits your strengths, and build a brand that resonates with your ideal customers. From there, AI guides you through creating a one-page business plan in under 20 minutes, or even a full investor-ready plan if you're ambitious. But this isn't just theory. You'll learn how to build a website from scratch without coding while AI writes all your copy. Craft offers your audience truly wants with messaging that converts. Launch marketing campaigns on a zero-dollar budget with content scheduled and ready. Sell confidently without feeling salesy using AI-generated scripts. Deliver your product or service smoothly and professionally. Scale your business smartly when the timing and resources are right. Maintain long-term momentum and avoid burnout all while staying consistent. Every chapter is a hands-on demo showing you exactly how to use AI tools to do the work so you spend your time focusing on decisions and strategy, not tedious tasks. Whether you're starting a side hustle, building a full-time business, or just exploring new opportunities, this guide takes you from zero to launch day and beyond with clarity, confidence, and speed. By

the end of the book you won't just have a business idea you'll have a fully mapped AI assisted business ready to grow make money and scale all while you retain full control and freedom No guesswork No paralysis Just step by step guidance that makes building your dream business not only possible but practical The AI startup era is here It's time to stop waiting and start building You don't need a huge team a big budget or years of experience you just need a plan your skills and your AI partner This book shows you how to bring it all together About the Author My name is Meir Liraz though you'll find this book under my pen name Tom Berty I write the AI for Entrepreneurs series combining decades of real world experience with today's smartest tools For over 30 years I've built businesses guided entrepreneurs and explored nearly every corner of the small business world Along the way I've learned what works what doesn't and how to help others succeed faster My goal is simple to make entrepreneurship clearer smarter and more accessible for everyday folks As far as entrepreneurship goes I've been there done that and now I'm here to share what really works
