Pursuing Quality, Access, and Affordability Stephen C. Ehrmann, 2023-07-03 Whether they recognize it or not virtually all colleges and universities face three Grand Challenges Improve the learning outcomes of a higher education A large majority of college graduates are weak in capabilities that faculty and employers both see as crucial Extend more equitable access to degrees Too often students from underserved groups and poor households either don't enter college or else drop out without a degree The latter group may be worse off economically than if they'd never attempted college Make academic programs more affordable in money and time for students and other important stakeholder groups Many potential students believe they lack the money or time needed for academic success Many faculty believe they don't have time to make their courses and degree programs more effective Many institutions believe they can't afford to improve outcomes These challenges are global But in a higher education system such as that in the United States the primary response must be institutional This book analyzes how over the years six pioneering colleges and universities have begun to make visible cumulative progress on all three fronts

Mothering by Degrees Jillian M. Duquaine-Watson, 2017-05-31 In *Mothering by Degrees* I show how single mothers who pursue college degrees in early 21st century America must navigate a difficult course as they attempt to reconcile their identities as single mothers college students and in many cases employees As they combine these multiple and often competing roles and responsibilities they must also negotiate a balance between cultural ideals of motherhood and their own definitions of what it means to be a good mother particularly as those ideals and definitions are shaped within context of post welfare reform America and the post secondary institutions they attend By comparing the experiences of nearly 100 single mother college students attending three postsecondary education institutions in the United States I illustrate how these women navigate the various obstacles they encounter especially obstacles related to financial

concerns child care time constraints and the chilly climate of higher education In addition I demonstrate that the women regard postsecondary education not only as a means of escaping poverty but also as an extension of their mothering work something they do to help ensure the long term health and well being of their children Thus this project provides a situated comparative account of the experiences of single mothers who are college students in order to foster a better understanding of the complex ideologies and social structures that influence the life choices and education experiences of members of this important but understudied student population Finally the project discusses policies and programs that can help provide better support to single mother and may diminish the challenges they face as they endeavor to complete their education
