Sub-Saharan Africa Hiroyuki Hino, Gustav Ranis, 2014-06-05 It is widely acknowledged that youth unemployment is one of the most critical challenges facing countries in Sub Saharan Africa This volume brings together an eminent group of international scholars to analyse the extent and complex nature of this joblessness and offer a set of evidence based policy choices that could contribute to solving the problem in the short and long run Part I reviews the existing literature on youth unemployment and underemployment in Sub Saharan Africa from microeconomic and macroeconomic perspectives while Part II goes on to present detailed country studies of Ethiopia Ghana Kenya and South Africa These studies offer a deep understanding of the situation on the ground and consider country specific solutions Throughout the book it is argued that the standard ILO definition of unemployment is too narrow to correctly portray employment situations in Sub Saharan Africa Several alternative measures of unemployment are presented which show that joblessness is far more pervasive than commonly assumed in the literature This volume will be of interest to academics and policy makers involved in African development **4-Gen Leadership** Mark White, Sami Scarpitti, 2024-12-06 4 Gen Leadership Thriving in a Multi

Achieving the Demographic Dividend in the Arab Republic of Egypt, Sameh El-Saharty, Heba Nassar, Sherine Shawky, Amr Elshalakani, Yi Zhang, Nahla Zeltoun, 2022-09-23. The Arab Republic of Egypt was well on the path to achieving its demographic dividend at the turn of this century but has gone off track due to a reversal in its earlier fertility decline. But what is the demographic dividend? It reflects the economic benefits when a country undergoes a rapid decline in mortality, then fertility, and the consequent demographic transition. Due to lower fertility and fewer children per household, a growing working-age population increases productivity and per capita income, leading to accumulated savings, investments, and economic growth, underscoring the strong link between demographics and economic growth. Fortunately, Egypt has the political will, resources, and capacity to achieve its demographic dividend in the next decade, as this report by a team of Egyptian and World Bank experts shows. It reviews the trends in determinants of the rising total fertility rate, the likely factors that contributed to Egypt's fertility decline reversal, the government's initial response, and the sectoral and social drivers that may have influenced this fertility decline reversal. It also assesses the economic impact of the demographic changes, including estimates of forgone savings due to the increased fertility and of potential future gains if the country were to regain and then accelerate its fertility decline. Drawing on global evidence, the report proposes six policy and strategic priorities complemented by four policy imperatives. These priorities aim to increase the contraceptive prevalence rate, the most important of the six, reduce school dropouts, increase female labor force participation, delay early marriage, leverage social protection programs, and improve governance of the country's population program. The four imperatives aim to assure broad-based socioeconomic development and they include creating productive jobs, investing in and leveraging human capital, enhancing financial inclusion, and entrepreneurship, especially for women, and sustaining macroeconomic stability. The

president's Decent Life Initiative and the National Project for the Development of the Egyptian Family can be used as the platform to implement many of the proposed policies and strategies. In such a manner, Egypt will be back on track to achieve its demographic dividend. Pacific Youth, 1981.
