Canadian Labour Policy and Politics John Peters, Don Wells, 2022-11-01 Canadian Labour Policy and Politics is essential reading for undergraduates studying Canada's labour market. This comprehensive textbook traces the causes and rise of labour inequities and outlines solutions for a more sustainable future. Written in clear and accessible language by leading experts and practitioners, this book demonstrates how and why laws and public policy intended to protect workers often leave employees vulnerable and with little economic or social security. Based on up-to-date data and framed in the context of international developments, this essential text provides readers with real-world examples and case studies of how globalization, labour laws, employment standards, COVID-19 and other issues affect workers on and off the job. Canadian Labour Policy and Politics invites students into defining a policy agenda for developing greater economic equality and political inclusiveness while fostering a green recovery. Key features include chapter summaries and outlines, suggestions for further reading and glossaries of key terms.

Stephen Hamnett, Robert Freestone, 2017-10-24 Australia has long been a highly sub-urbanized nation, but the major distinctive feature of its contemporary settlement pattern is that the great majority of Australians live in a small number of large metropolitan areas focused on the state capital cities. The development and application of effective urban policy at a regional scale is a significant global challenge given the complexities of urban space and governance. Building on the editors' previous collection *The Australian Metropolis: A Planning History 2000*, this new book examines the recent history of metropolitan planning in Australia since the beginning of the twenty-first century. After a historical prelude, the book is structured around a series of six case studies of metropolitan Melbourne, Sydney, Adelaide, Perth, the fast-growing metropolitan region of South East Queensland centred on Brisbane, and the national capital of Canberra. These essays are contributed by some of Australia's leading urbanists. Set against a dynamic background of economic change, restructured land uses, a more diverse population and growing spatial and social inequality, the book identifies a broad planning consensus around the notion of making Australian cities more contained, compact and resilient. But it also observes a continuing gulf between the simplified aims of metropolitan strategies and our growing understanding of the complex functioning of the varied communities in which most people live. This book reflects on the raft of planning challenges presented at the

metropolitan scale looks at what the future of Australian cities might be and speculates about the prospects of more effective metropolitan planning arrangements      **Philippine Plan for Gender-responsive Development 1995-2025** ,1995 Lays out development goals and strategies that will make gender equity innate in public programmes and policies      *Contractor* ,1917      Journal of the Senate of the United States of America United States.
