**Surveillance Education** Nolan Higdon, Allison Butler, 2024-08-02 Surveillance Education explores the pervasive use of digital surveillance technologies in schools and assesses its pernicious effects on students Recognizing that

the use of digital technologies will persist the authors instead offer practical ways to ameliorate their impact In our era of surveillance capitalism digital media technologies are ever more intertwined into the educational process Schools are presented with digital technologies as tools of convenience for gathering and grading student work as tools of support to foster a more equitable learning environment and as tools of safety for predicting or preventing violence or monitoring mental emotional and physical health Despite a dearth of evidence to confirm their effectiveness digital data collection and tracking is often presented as a way to improve educational outcomes and safety This book challenges these fallacious assumptions and argues that the use of digital media technologies has caused great harm to students by subjecting them to oppressive levels of surveillance impinging upon their right to privacy and harvesting their personal data on behalf of Big Tech In doing so the authors draw upon interviews from K 12 and higher education students teachers and staff civil rights and technology lawyers and educational technological programmers The authors also provide practical guidance for teachers administrators students and their families seeking to identify and combat surveillance in education This urgent eye opening book will be of interest to students and educators with interests in critical media literacy and pedagogy and the sociology of technology and education     **Collier's** ,1923     **Educational Times** ,1916     *These Strange New Minds* Christopher Summerfield,2025-03-11 An insider look at the Large Language Models LLMs that are revolutionizing our relationship to technology exploring their surprising history what they can and should do for us today and where they will go in the future from an AI pioneer and neuroscientist In this accessible up to date and authoritative examination of the world s most radical technology neuroscientist and AI researcher Christopher Summerfield explores what it really takes to build a brain from scratch We have entered a world in which disarmingly human like chatbots such as ChatGPT Claude and Bard appear to be able to talk and reason like us and are beginning to transform everything we do But can AI think know and understand What are its values Whose biases is it perpetuating Can it lie and if so could we tell Does their arrival threaten our very existence These Strange New Minds charts the evolution of intelligent talking machines and provides us with the tools to understand how they work and how we can use them Ultimately armed with an understanding of AI s mysterious inner workings we can begin to grapple with the existential question of our age have we written ourselves out of history or is a technological utopia ahead     [Panic Now?](#) Ira Allen,2024-06-11 When was the best time to panic about the varying crises facing humanity Twenty years ago But the next best time Now In line with other considerations of what we have come to call the Anthropocene in *Panic Now Tools for Humanizing* Ira J Allen takes the reader on a journey through difficult feelings about the various crises facing humanity and from there to new ways of facing impending dread with a sense of empowerment The interrelated threats of climate collapse an artificial intelligence revolution a sixth mass extinction a novel chemical crisis and more are all brought to us by what Allen describes as CaCaCo the carbon capitalism colonialism assemblage After suggesting that it is absolutely time to panic he asks how do we manage to panic productively Admitting there is no one script for

everyone to follow the author traces how we might adopt attitudes and practices that allow us to move through this liminal space between fear and action collectively This book is a master class in how to create better more humanizing outcomes by confronting the panic that goes along with the realization that the world as we know it is ending Rather than remaining mentally emotionally imaginatively and practically stuck in this historical condition Allen invites us to a very particular action oriented mode of panic which can indeed incite our imaginations to move from panic to empowerment **Feminist Futures**

**of Work** Payal Arora,Usha Raman,René König,2025-10-01 The future of work is at the centre of debates related to the emerging digital society Concerns range from the inclusion equity and dignity of those at the far end of the value chain who participate on and off platforms often in the shadows invisible to policymakers designers and consumers Precarity and informality characterize this largely female workforce across sectors ranging from artisanal work to salon services to ride hailing and construction A feminist reimagining of the futures of work what we term as FemWork is the need of the day and should manifest in multiple and various forms placing the worker at the core and drawing on her experiences aspirations and realities This volume offers grounded insights from academic activist legal development and design perspectives that can help us think through these inclusive futures and possibly create digital social and governance infrastructures of work that are fairer and more meaningful Musical Courier and Review of Recorded Music ,1921 West's California Reporter ,1982 *Medical Decision Making* Harold C.
