productivity and profitability are not realized In more severe circumstances software development firms have failed and face the threat of going bankrupt being acquired or suffering closure because customers are demanding high quality software products that they consistently fail to deliver Small and medium enterprises SMEs operating within the software development industry have a more critical need to produce high quality software since they are less able to absorb both the cost and the reputational impact of producing low quality output A Software Development Approach for Driving Competitiveness in Small Firms provides some cost efficient options that can help SMEs increase the likelihood that their software will be of high quality It tells the story of the entrepreneurial journey that small firms should take to deliver high quality software products By utilizing practical examples and providing several recommended solutions to decrease the likelihood of producing low quality software the book outlines how mobilizing people processes and technology are integral to the software development process and emphasizes why process maturity is the most influential factor in software development in small and medium enterprises
