Simple Ai Customer Support Bot For Digital Nomads:

AI Chatbots in Customer Service Evgeny Kagan, Maqbool Dada, Brett Hathaway, 2022 Despite recent advances in language processing algorithms chatbot technology continues to face adoption hurdles We survey chatbot users about their experiences and use their testimonies to construct a decision model of customer choice between the chatbot service channel and the live agent service channel The fundamentals of this choice are the time spent in line and in service the chatbot's success rate and the qualitative differences in the service experience provided by the chatbot and by the live agent We then conduct experiments in which participants choose and then experience the chatbot or the live agent channel as we vary operational i.e. times spent and chatbot success rates and qualitative features of the chatbot We find that users respond positively to improvements in chatbot operational performance however the chatbot channel remains underutilized relative to what expected time minimization would predict Additional experiments show that this underutilization is caused by two separate mechanisms algorithm aversion aversion to an algorithmic service provider and gatekeeper aversion aversion to any service format that may involve multiple stages Examining potential remedies we find that algorithm aversion can be mitigated by making salient the expected time savings offered by the chatbot However gatekeeper aversion is more persistent and harder to overcome We conclude by building and estimating a structural model of channel demand and by proposing a behavior aware service design that reduces the firm's staffing costs by up to 22% Smart Bots, Happy Customers Gosia Szaniawska-Schiavo, 2024-08-26 Did you know that AI can automate up to 58% of customer service interactions Our study on chatbot statistics also confirmed that almost 1.5 million people had at least one conversation with a chatbot within the past year Well AI revolutionized how businesses help their clients It enabled 24/7 support through chatbots and virtual assistants increased efficiency and allowed human agents to focus on more complex issues There is just one issue Not every chatbot is AI Simultaneously not all AI powered solutions will be perfect for all tasks related to customer service especially in the ecommerce field Believe us we would know At Tidio we help 300k businesses worldwide automate customer service collect leads on autopilot and increase sales Tidio is one of the most installed chatbot and live chat companies worldwide specializing in providing tailored customer service solutions We always strive to be on the cutting edge and respond to our customers biggest challenges One of them is strategically combining rule based and AI powered chatbots so that businesses can elevate their customer service to new heights **AI Agents vs. AI Chatbots: A Strategic Guide for B2B Customer Service** Branislav Bozanic, 2025-04-01 In 2021 Uber was expanding at a staggering rate but growth came at a cost After pandemic related restrictions eased the multinational American transportation company faced severe driver shortages and regulatory hurdles that slowed the hiring of new drivers Wait times surged prices fluctuated and customer frustration grew One of the biggest bottlenecks was due to customer support The high volume of tickets coming in across multiple channels required manual processing And therein lay their problem Even Uber couldn't keep up with all the

customer support demands. This resulted in slow response times, inconsistent resolutions, and high operational costs. However, their team didn't panic. There was an obvious solution: AI-driven technologies. More precisely, an AI-powered robotic process automation (RPA) system. Uber quickly implemented RPA to categorize tickets and handle repetitive and time-consuming customer support tasks. The results? Processing time for common issues dropped from days to minutes. Customer satisfaction skyrocketed with faster response times. Cost savings were massive, with the company revenue growing from 17 to 32 billion US dollars the following year.
