Smart Bots, Happy Customers Gosia Szaniawska-Schiavo, 2024-08-26 Did you know that AI can automate up to 58% of customer service interactions Our study on chatbot statistics also confirmed that almost 15 million people had at least one conversation with a chatbot within the past year Well AI revolutionized how businesses help their clients It enabled 24/7 support through chatbots and virtual assistants increased efficiency and allowed human agents to focus on more complex issues There is just one issue Not every chatbot is AI Simultaneously not all AI powered solutions will be perfect for all tasks related to customer service especially in the ecommerce field Believe us we would know At Tidio we help 300k businesses worldwide automate customer service collect leads on autopilot and increase sales Tidio is one of the most installed chatbot and live chat companies worldwide specializing in providing tailored customer service solutions We always strive to be on the cutting edge and respond to our customers biggest challenges One of them is strategically

combining rule based and AI powered chatbots so that businesses can elevate their customer service to new heights **AI Chatbots in Customer Service** Evgeny Kagan, Maqbool Dada, Brett Hathaway, 2022 Despite recent advances in language processing algorithms chatbot technology continues to face adoption hurdles We survey chatbot users about their experiences and use their testimonies to construct a decision model of customer choice between the chatbot service channel and the live agent service channel The fundamentals of this choice are the time spent in line and in service the chatbot's success rate and the qualitative differences in the service experience provided by the chatbot and by the live agent We then conduct experiments in which participants choose and then experience the chatbot or the live agent channel as we vary operational i.e. times spent and chatbot success rates and qualitative features of the chatbot We find that users respond positively to improvements in chatbot operational performance however the chatbot channel remains underutilized relative to what expected time minimization would predict Additional experiments show that this underutilization is caused by two separate mechanisms algorithm aversion aversion to an algorithmic service provider and gatekeeper aversion aversion to any service format that may involve multiple stages Examining potential remedies we find that algorithm aversion can be mitigated by making salient the expected time savings offered by the chatbot However gatekeeper aversion is more persistent and harder to overcome We conclude by building and estimating a structural model of channel demand and by proposing a behavior aware service design that reduces the firm's staffing costs by up to 22% *AI-Augmented Customer Service Representative* HEBooks, Feeling overwhelmed by endless tickets long response times and customers who expect instant help AI Augmented Customer Service Representative gives you the tools to deliver faster smarter and more personalized support using AI that works alongside you to boost productivity and customer satisfaction Inside you'll learn How to manage and optimize AI chatbots and virtual agents Personalize customer interactions using AI driven insights Resolve issues faster with smart suggestions and automation Stay ahead in the AI powered future of customer service No fluff No jargon Just practical step by step strategies for real customer service pros ready to level up with AI A perfect gift for Customer service reps call center agents support team leads and CX professionals who want to master AI powered service and boost their impact Ready to stop repeating answers and start resolving with AI Your customer service edge starts here
