Regardless, as the largest generation following the post World War II baby boom, Millennials will surely leave their mark on cities. This book assesses the impact of Millennials on cities. It asks how the Millennial generation differs from previous generations in terms of their labour market experiences, housing outcomes, transportation decisions, the opportunities available to them and the constraints they face. It also explores the urban planning and public policy implications that arise from these generational shifts. This book offers a generational lens that faculty students and other readers with interest in the fields of urban studies, planning, geography, economic development, demography or sociology will find useful in interpreting contemporary U.S. and Canadian cities. It also provides guidance to planners and policymakers on how to think about Millennials in their work and make decisions that will allow all generations to thrive.
