**Digital Literacies** Mark Pegrum, Nicky Hockly, Gavin Dudeney, 2022-05-11 Dramatic shifts in our communication landscape have made it crucial for language teaching to go beyond print literacy and encompass the digital literacies which are increasingly central to learners' personal, social, educational and professional lives. By situating these digital literacies within a clear theoretical framework, this book provides educators and students alike with not just the background for a deeper understanding of these key 21st century skills but also the rationale for integrating these skills into classroom practice. This is the first methodology book to address not just why but also how to teach digital literacies in the English language classroom. This book provides a theoretical framework through which to categorise and prioritise digital literacies. Practical classroom activities to help learners and teachers develop digital literacies in tandem with key language skills. A thorough analysis of the pedagogical implications of developing digital literacies in teaching practice. A consideration of exactly how to integrate digital literacies into the English language syllabus. Suggestions for teachers on how to continue their own professional development through PLNs (Personal Learning Networks) and how to access teacher development opportunities online. This book is ideal for English language teachers, English language learners of all ages and levels, academics and researchers of all age groups and levels, academics and students researching digital literacies, and anyone looking to expand their understanding of digital literacies within a teaching framework. *New Frontiers for Inclusion* Joy Goodman-Deane, Emilene Zitkus, Anke Brock, John Clarkson, Hua Dong, Ann Heylighen, Jonathan Lazar, 2025-05-11 This book presents papers from the 12th Cambridge Workshop on Universal Access and Assistive Technology (CWUAAT 2025) to be held in April 2025. This workshop series has hosted the multifaceted dialogue on design for inclusion since 2002, involving disciplines including design, computer science, engineering, architecture, ergonomics, and human factors, policy, and gerontology. The conference theme for 2025 is 'New frontiers for inclusion'. The major themes dealt with in this collection include: Understanding people; Designing for an ageing population; Designing for particular needs; Designing inclusive environments; New challenges and opportunities; the possibilities and challenges for inclusive design offered by AI and other emerging technologies. With its thematic wealth, this proceedings provides a unique insight into the current national and international research in the fields of inclusive design, universal access, and assistive and rehabilitative technology.
