The Privatisation of Knowledge Massimo Florio, 2023-09-14 This book deals with the emergence of intellectual monopolies It explores different ways of producing knowledge thus showing alternatives to the current dominant paradigm which is based on turning knowledge produced collectively into intangible assets owned by a few leading corporations It discusses a paradox knowledge creation by government sponsored research infrastructures RI or by non profit institutions including universities is increasingly appearing in the form of open science ideas and data are widely available in the public domain However such knowledge is privatised downstream by new oligopolies These oligopolies such as the Tech Giants are protected by legislation on intellectual property rights that restricts further access to knowledge This process contributes to increasing social inequality The book suggests alternative policy options to counteract this process the design of new players

with a public mission and a coalition of governments as patient investors for the long term benefit not just of the citizens of one jurisdiction but for creating global public goods

Proposals are presented for launching European R D infrastructures related to three major long term challenges health risks climate change and Big Data governance These knowledge intensive enterprises should offer innovation as a public good for example in new biomedical fields underinvested by private firms disruptive green technologies digital platforms based on transparent users ownership of data

Offering a balanced combination of theories and practical applications including interesting case studies the book will appeal to students scholars and researchers of public economics and governance It will also find an audience among policymakers practitioners and government officials
